
Shan Manzoor – Chemical Engineer

Current Address: Jubail, Saudi Arabia

Mobile#: +966596524108

Iqama Status Transferable Iqama

E-mail: shanmanzoor220@gmail.com

Career Objective

Pursuing a challenging position for Chemical engineering where excellent analytical skills, strong work ethics and enthusiasm can enhance profitability.

Academic Qualifications

B.Sc. [Chemical Engineering] 2019-2023	CGPA: 3.37/ 4.0	NFC, Institute of Engineering & technology, Multan, Pakistan.
F.SC. [Pre-Engineering] 2019	Percentage: 70 %	Punjab Group of Colleges, Multan, Pakistan. 2017-
Matriculation [Science] 2015-2017	Percentage: 85 %	Pak Educational Public School, Multan.

Experience

Sep 2024 – Sep 2025 (Production Engineer)

**Rekas Protech Contracting Company,
Riyadh, Saudi Arabia (NADEC PROJECT)**

Responsibilities:

- Installation & Maintenance of RO (Reverse osmosis) water treatment plant and ensuring efficient operation.
- Analyzing manual and automated test data for defects, process deviations, and performance issues.
- Maintaining accurate daily and monthly operational records for reporting and monitoring.
- Troubleshooting feed and process related issues to maintain smooth operations.
- Ensuring proper start-up and shutdown of the plant as per operational procedures.
- Managing daily activities to meet production targets and maintain system reliability.
- Maintaining quality assurance and operational control process documentation.

May 15, 2023 – Sep 05, 2024 (Chemical Engineer)

Chemical Kinetics, Lahore, Pakistan

Responsibilities:

- Preparing technical proposals for Reverse Osmosis Plant. Receiving and reviewing the client's order to ensure that it is as per the proposal and the client's requirements are achievable.
- To find technical solutions to the problems faced by the users regarding water treatment.
- Reviewing PFD as per operational and technical requirement.
- Preparing and providing technical presentations explaining products or services to customers
- Reviewing inquiry details, conducting site surveys, analyzing and interviewing clients to ensure a clear understanding of requirements.
- Monitoring the plant to ensure its operation as per the design.

June 17, 2022 to July 15, 2022 (Internship)

Agro Food Processing Facilities, Multan, Pakistan.

- Understanding the fruit (mango pulp) processing plant, visiting plant site equipment like feeding conveyor, washing system, destoner, heat exchangers, deaerator, boiler, cooling tower etc..
- Analysis of final product filling, packing and storage systems and reducing sugar, total sugar inversion, Brix and pH.
- Water Hardness, PH and TDS analysis

July 18, 2022 to Aug 18, 2022 (Internship)

Pak American Fertilizers Limited, Mianwali, Pak.

- Review of PFDs, Process descriptions of Ammonia & Utility plants
- To understand Ammonia manufacturing process (Heat exchangers, Tanks, surface condenser, absorber, stripper, Furnace, converter, pumps etc.) and related utilities requirements.
- To evaluate the Ammonia synthesis parameters & compare with the PFD

Personal Skills

- Effective Communication & Leadership skills
- Ability to work in a dynamic environment with strong analytical ability
- Problem-solving and time-management skills
- Open to learn and explore new technology and domain
- Ability to do multi-task and have strong troubleshooting Skills with good decision power

Computational Skills

- MS Office (Word, PowerPoint, Excel)
- ROSA & IMS Software
