PROFILE

Dedicated and detail-oriented QA/QC Inspection Engineer with hands-on experience in pipeline inspection, coating inspection, and asset integrity management in the oil & gas sector. Skilled in NDT methods, coating quality control, and pipeline maintenance activities in accordance with ASME, API, ASNT, and NACE standards. Experienced in Ultrasonic Thickness, surface preparation assessment, coating inspection, and holiday detection for long-distance pipeline projects. Proven ability to ensure safety compliance, coating integrity, and preparation of detailed inspection reports.

PROFESSIONAL EXPERIENCE

Jan 2026 – Present
Rajampur, Punjab

Inspection Engineer

PARCO pipeline Maintenance Project

- Performed UT Testing to assess wall thickness and monitor corrosion.
- Surface Profile Measurement to ensure proper surface preparation.
- Inspected epoxy coating application for effective corrosion protection.
- Verified coating thickness using DFT testing as per specifications.
- Carried out Holiday Detection Testing to identify coating defects.
- Ensured compliance with NACE and international coating standards.
- Experience in pipeline integrity assessment using Ultrasonic Thickness Gauging (UTG) to monitor corrosion and material loss.

May 2024 – Dec 2025
Karachi, Pakistan

Inspection Engineer

MH Engineering Pvt Ltd

- Conduct inspections of pipelines, static equipment, and mechanical assets to ensure integrity and safety.
- Perform NDT techniques including UT, DPT, MPT, and UTG.
- Inspect lifting equipment as per LEEA standards.
- Ensure compliance with ASME, API, ASNT standards.
- Prepare detailed inspection and technical reports.

EDUCATION

Oct 2019 – Oct 2023

B.E Metallurgy & Materials Engineering

Mehran University Of Engineering & Technology Jamshoro 

INTERNSHIPS

Jun 2023 – Jul 2023
Karachi, Pakistan

Internee

Karachi Shipyard & Engineering Works 

- Exposure to shipbuilding, welding, and steel fabrication
- Assisted QC team in NDT inspections (UT, UTG, DPT, MPT)
- Ensured compliance with NACE coating standards and project quality requirements.
- Prepared inspection reports and coordinated with site teams for corrective actions.

Dec 2022 – Jan 2023
Lahore, Pakistan

Internee

Pakistan Council Of Scientific & Industrial Research Lahore 

- Performed mechanical and metallurgical testing of materials and components in accordance with relevant standards.
- Assisted in hydrostatic and pneumatic pressure testing of flanges, valves, and pipeline fittings to ensure integrity and safety.
- Conducted hardness testing and visual inspections to evaluate material properties and detect defects.
- Prepared test reports and documentation, ensuring compliance with ASME, ASTM, and API standards.

SKILLS

MS Office

Excel, Word, PowerPoint

NDT

DPT,MPT,UTG

Metallography

Welding Inspection

Teamwork

Communication Skills

Quality Control

COURSES

Jan 2024 – Feb 2024

EPC Planning Engineer

Primavera P6

Sep 2022 – Sep 2022

NDT Course

Mehran University, Jamshoro

Feb 2021 – May 2021

Computer Literacy (MS Office)

Oct 2020 – Jan 2021

AutoCAD 2D/3D

CERTIFICATES

ASNT Level-II (UT, MPT, DPT).

OSHA 30 Hours General Industry

Certificate No: 35-79720

Registered Engineer from Pakistan Engineering Council

Registration No: Metal-007057

CLIENT / PROJECT PORTFOLIO

- Crescent Steel & Allied Products
- FOTCO LNG Terminal
- Cnergyico Oil Refinery
- Attock Cement Factory
- Lucky Cement Factory
- Karachi Shipyard & Engineering Works
- Port Qasim, Karachi
- Hutchison Port, Karachi
