Skills

- Corrosion Testing and Prevention
- Non-Destructive Testing (NDT)
- Maintenance
- Failure Analysis
- Mechanical Testing
- Research and Development
- Problem Solving
- Critical Thinking
- Quality Control
- Communications Skills
- Multi-Tasking
- MS OFFICE (Word, Excel, PowerPoint)

Experienced metallurgist with expertise in metallurgical techniques, material properties, testing, and manufacturing processes, specializing in heat treatment and failure analysis. Holds an IOSH certification for compliance with health and safety regulations. Motivated to solve practical problems and implement modern, advanced, and eco-friendly engineering solutions while prioritizing a safe work environment.

Work History

2024-01

Internship

Hi Tech Pipe & Engineering Industries, Kotri

- Company Overview: Hi-Tech pipe & engineering industry is a Pakistani pipe manufacturing & reputable company that produces HDPE pipes, known for its high-quality products, reliable services, and customer-centric approach
- Assisted in the optimization of production processes for HDPE pipe manufacturing, focusing on efficiency and cost reduction
- Learning about HDPE pipes welds & joints
- Quality & control tests of raw material
- Hi-Tech pipe & engineering industry is a Pakistani pipe manufacturing & reputable company that produces HDPE pipes, known for its high-quality products, reliable services, and customer-centric approach

2022-06 -
2022-07

Internship

Agha Steel Industries, Karachi, Sindh

- Company Overview: Agha Steel Industries Limited –ASIL– is a Pakistani steel manufacturing company that produces steel bars, wire rods, and billets
- Understanding the overall Steel production process from scrap to billets
- Learning about quality control processes to ensure the steel meets industry standards
- Following health and safety procedures
- Agha Steel Industries Limited –ASIL– is a Pakistani steel manufacturing company that produces steel bars, wire rods, and billets

Education

2021-01 -
2024-11

B.E: METALLURGY & MATERIAL ENGINEERING

Mehran University of Engineering and Technology
PROJECT/THESIS Development And Indigenous Axial (tensilecompressive) Fatigue Testing Machine At lab Scale For Non-Ferrous Engineering Materials. Design a machine with a donkey pump which is enables axial fatigue testing machine.

Certifications

IOSH Managing Safely V5.0

Project Thesis

Development And Indigenous Axial (tensile-compressive) Fatigue Testing Machine At lab Scale For Non-Ferrous Engineering Materials. Design a machine with a donkey pump which enables axial fatigue testing machine.
