

MUHAMMAD ABRAR

Assistant Engineer – QA/QC

 Email: abrar8355@gmail.com |  Phone: +92 315 2316689

 Address: A/273 P & T Society, Sec-31D, Karachi, Pakistan

 DOB: 01-Aug-1995 | Nationality: Pakistani | Marital Status: Married | Gender: Male

Profile

Bachelor in Mechanical Technology with 9+ years of professional experience in steel manufacturing and process industries. Skilled in destructive and non-destructive testing, quality control, metallurgical analysis, and international standards (ISO 9001, ISO 14001, ASTM, JIS, SASO). Proficient in operating advanced laboratory equipment including Spectromax PDA-7000, Shimadzu Universal Tensile Testing Machine, Rockwell, Vickers, Zwick/Roell hardness testers, and Cupping machines. Demonstrated ability to conduct failure analysis, metallographic examinations, and chemical composition analysis while ensuring compliance with global quality standards.

Professional Experience

Assistant Engineer – QA/QC

International Steels Limited | Karachi, Pakistan

 *Mar 2020 - Present*

- Conduct tensile testing using Shimadzu Universal Tensile Testing Machine.
 - Inspect galvanized and color-coated coils using Elcometer.
 - Perform chemical composition analysis using PDA-7000 Optical Emission Spectrometer.
 - Conduct Rockwell, Vickers, and Zwick/Roell hardness tests.
 - Perform cupping, fluting, and T-bend tests to assess material properties.
 - Ensure compliance with ISO 9001 & 14001, JIS, SASO, ASTM standards.
 - Perform startup checks and finish goods monitoring per sampling plan.
 - Prepare technical reports including Trouble Reports, Inspection Reports, Rejection Reports.
 - Collaborate with cross-functional teams for quality improvement and process optimization.
 - Report non-conforming products and recommend corrective & preventive actions (CAPA).
 - Validate new raw materials, machines, and production lines.
 - Conduct laboratory testing of incoming raw materials and in-process inspections.
-

Laboratory Technician – Mechanical QA/QC

International Steels Limited | Karachi, Pakistan

 *Mar 2016 - Mar 2020*

- Conducted tensile, hardness, and pot chemistry tests on zinc samples.
 - Performed visual inspection of running coils and pesserite tests.
 - Implemented reject and secondary coil sorting processes to maintain product quality.
-

Inspector

Ghizani Engineering | Karachi, Pakistan

 Jan 2015 - Mar 2016

- Conducted Brinell hardness and impact tests on leaf springs.
 - Inspected U-bolts, rebound clips, spring bolts, spring seat, spring center bolts, spring eye bush.
 - Measured camber readings using hydraulic jack.
 - Prepared and managed all quality/testing reports.
-

Education

- Bachelor in Mechanical Engineering & Technology (CGPA 3.03 / 4.00)
Indus University | 2015 - 2021 | Karachi, Pakistan
 - Diploma in Mechanical Technology (Grade A)
S.M.A. Rizvi Textile Institute | 2011 - 2014 | Karachi, Pakistan
 - Matric in Science (Grade B)
Crescent Islamic English School | 2009 - 2011 | Karachi, Pakistan
-

Certifications & Trainings

- Non-Destructive Testing Level II – Udemy
 - Six Sigma Green Belt (CSSGB) – International Institute of Business Analysis
 - Occupational Safety & Health Hazards
 - Firefighting, Emergency Response, First Aid & 5S Activities
-

Achievements

- Conducted failure analysis leading to improved product reliability and reduced warranty costs.
 - Designed & implemented quality control procedures, resulting in reduced defects and higher production efficiency.
 - Developed training programs for manufacturing staff, improving quality control skills & customer satisfaction.
-

Skills

- Assurance & Quality Control (QA/QC)
- Destructive & Non-Destructive Testing (NDT Level II)
- Mechanical Testing (Tensile, Hardness, Cupping, Metallography)
- ISO 9001, ISO 14001, ASTM, JIS, SASO Standards
- Metallurgical & Chemical Analysis
- Problem Solving & Root Cause Analysis
- Report Preparation & Documentation
- Cross-functional Team Collaboration
