CAREER OBJECTIVE

Seeking a challenging QC Welding Inspector position, demanding the rigorous application of certified expertise and commitment. Dedicated to applying CSWIP 3.1 Welding Inspector and ASNT NDT Level II (RT, UT, MT, PT, VT) credentials to direct rigorous inspection and quality assurance protocols. Leverages metallurgical background to excel in defect analysis and enforcing strict AWS/ISO/ASTM standards, contributing to maximum product integrity. Committed to realizing full potential and contributing to impressive organizational development; Open to global relocation overseas and anywhere in India.

PROFESSIONAL SUMMARY

Detail-oriented Metallurgical Engineer with 3 years of hands-on experience in the metals and materials industry, including 2 years as a Junior Metallurgist and 1 year as a Engineer in quality control. Capable of material testing, welding inspection, microstructure evaluation and failure analysis, all in accordance with ASTM, ISO and AWS codes and standards. Experienced in introducing process improvements that will yield an increase in customer product reliability, a reduction in manufacturing defects, and an increase in production efficiency. Certified in CSWIP 3.1 Welding Inspector and ASNT NDT Level II (RT, UT, MT, PT, VT) with proven expertise in metallography, weld quality inspection, and mechanical testing. Demonstrated ability to maintain rigorous standards of safety, precision, and quality across metallurgical and inspection processes within industrial environments.

PROFESSIONAL EXPERIENCE

MICROLAB, Chennai
(Junior Metallurgist)

Aug 2022 – July 2024

- Performed comprehensive mechanical, chemical, and metallography testing, adhering strictly to ASTM, ISO, and AWS standards.
- Analyzed microstructural properties and conducted routine hardness analysis utilizing advanced optical and stereo microscopes
- Assisted in the documentation, standardization, and maintenance of quality control procedures for raw materials and finished products.
- Contributed to material failure investigations by interpreting test data for root cause analysis, and documented findings in technical reports.
- Maintained detailed records of testing, calibration, and quality documentation, ensuring organizational readiness for internal and NABL audits.
- Identified opportunities for improving testing quality and reducing acid consumption through routine process evaluation
- Collaborated with cross-functional teams and interacted with third-party organizations like BARC, IRS, VSSC, and TUV to expedite material verification

- Managed and coordinated the daily work schedule for the welding team, ensuring the team met all production goals and deadlines efficiently
- Ensured product quality by personally checking all welds (pre-weld, during, and final) against project blueprints and strict quality specifications.
- Quickly solved problems and technical defects during the welding process to minimize errors, preventing costly rework and production delays.
- Trained new and junior welders on correct welding methods and company quality standards, helping them improve their skills and meet required performance levels.
- Maintained a safe work environment and strictly enforced safety rules and compliance requirements, performing daily audits to keep the team protected.

TECHNICAL SKILLS

- Metallurgical Analysis: Microstructural Analysis, Metallography, Root Cause Failure Analysis, Material Characterization, Mechanical Testing, Chemical Testing.
- Non-Destructive Testing (NDT): Visual Inspection (VT), Magnetic Particle Testing (MT), Liquid Penetrant Testing (PT), Ultrasonic Testing (UT), Radiographic Testing (RT)
- Welding Inspection & Fundamentals: Proficient in Weld Defect Identification, Blueprint Interpretation, and confirming proper Welding Procedure Specifications (WPS). Competent in using precision measuring tools for Dimensional Verification and managing routine equipment maintenance.
- Quality & Compliance: ASTM, ISO, and AWS Standards, Quality Control (QC) Procedures, OSHA Safety Compliance
- Software & Reporting: LIMS and Leica Systems Proficiency, Technical Report Generation, Microsoft Office Suite.

EDUCATION

Bachelor of Engineering (B.E.) – Metallurgical Engineering
Anna University, Chennai

PERSONAL PROFILE

- NAME : MOHAMED THAMEEM
- DATE OF BIRTH : 04/04/2001
- GENDER : MALE
- NATIONALITY : INDIAN
- PASSPORT DETAILS : B6478581
