☎ +966-530548307/ +91-8423799555

Objective

An Experienced and Qualified QA/QC Mechanical Engineer having relevant experience in different stages of Construction, Maintenance, Fabrication and Erection of Static Equipment & Manufacturing of products for Oil & Gas, Power Plants, Fertilizers, Railways, Shipbuilding etc.

Key Responsibilities

- Responsible for ensuring that the products produced shall meet quality standards as required to minimize quality costs and maximize customer satisfaction whilst ensuring that the procedures and process are adhered to.
- Responsible for witnessing, conducting & evaluating the Welding Procedure Qualification test on site.
- Responsible for witnessing, conducting & evaluating the Blasting and Painting Operator Qualification test on site.
- Responsible for reviewing the prepared NDT & PWHT request on site & submitting along with the Qualification test coupons to Subcontractor.
- Responsible for preparation of Mechanical test request on site & submitting along with job file to his line supervisor.
- Responsible for the operational support of all activities connected to Welding Procedure Qualification test and Welder / Welding Operator Qualification test. Witness Qualification of Coating processes.
- Responsible for surveillance checks on welding consumables storage and handling.
- Responsible for surveillance checks on material storage and preservation.
- To qualify PQR, execute according to approved WPS & perform WQT
- To make RFI's for all inspection related activities like material part inspection, Fit-up and NDE as per client's requirements. Responsible for Incoming Raw Material Inspection.
- To monitor the performance of welders, analyze repair rates, material traceability and consumables traceability.
- To carry out Wet and Dry Film Thickness checks.
- To prepare daily reports on various job-related activities including consumables, day-to-day review and periodic inventory. To examine the surface preparation, record atmospheric condition prior to application of coat.
- Liaison with client / customer / customer's representative for inspection activities & clearances.
- Prepare test plan / Inspection plan / Checklist / Forms / Control Cards for critical components, assemblies used for inspections. To monitor and track the NDE progress welding and joint wise.
- Raise product NCRs wherever deviation is observed & conduct root cause analysis for corrective actions.
- Capable to handle NCR Management System.
- To verify & certify inspection reports, test Certificates related to casting/ forging, machined components, and NDT inspections.
- Handle Customer inspections & prepare inspection documents as per contractual requirement.
- Liaison with customer for inspection activities & participate in vendor preorder meeting to create QAP awareness to vendor. To conduct Vendor assessment audit, patrol audit & prepare the audit report.
- In depth knowledge of Quality procedures, Quality Plan, Welding procedures, raw material inspection requirements.

- In-process inspection requirements, Heat treatment requirements, Hydro test requirements, NDE requirements, final inspection requirements, Painting inspection requirements, Documentation and Quality dossier preparation requirements.
- Having good communication skill and decision-making ability, experience in working team environment.
- Knowledge of NCR, root cause analysis and corrective and preventive actions.
- Preparation & review of Inspection summary sheet & Material clearance record.
- Routine Surveillance checks of in process fabrication activity as well as Blasting and Coating/ Painting activities.
- Preparing necessary reports and reviewing with Third Parties and client representatives.
- Reviewing project / contracts / engineering requirement of products and preparing quality assurance plans for incoming, in-process and final inspection stages.
- Working together with suppliers and internal manufacturing teams to carry out feasibility studies, take initiatives for continual improvement of process performance and the quality of products.
- Carrying out inspections to confirm fulfillment of product quality requirements. Planning of inspection resources and coordinating with third-party inspection agencies as and when required.
- Preparing and reviewing inspection reports, product quality documentation, maintaining quality dossiers for product packages and maintaining the project documentation database.
- Identifying product and process non-conformances, ensuring their timely resolution by coordinating with concerned stakeholders, driving root cause analysis and ensuring effective implementation of corrective and preventive actions.
- Maintaining the database of lessons learned from inspections and non-conformances, providing awareness to teams through knowledge sharing sessions.
- Interfacing with customers, handling witness inspections, resolving customer queries and providing technical assistance to customers as and when required.
- Interacting with engineering team to optimize technical specifications by implementing learning from inspections and process monitoring.
- Supporting sourcing team in selection of suppliers, and conducting performance evaluation of suppliers.
- Providing assistance to execution teams at sites for quality related deliverables and supporting for timely resolution of any quality issues detected at sites.
- Maintaining process documentation as per ISO 9001, carrying out internal audits, preparation of audit reports and reporting of results to top management.
- Ensuring all compliances related quality management system through effective coordination with cross-functions and maintaining of documents and records.

TECHNICAL EXPERTISE

- Experience in the field of non-destructive testing & inspection related to construction, structural fabrication, oil & gas, petrochemical, nuclear & power plants etc.
- Maintenance inspection for monitoring corrosion survey of process piping of live plant.
- Knowledge of Welding Processes like SMAW, GMAW, GTAW & SAW (Manual, Horizontal and Vertical Overlay). Knowledge of ITP, PQR & WPS etc.
- Perform the Duties of a Welding and Painting Inspector as Before, During & After Welding and Painting.
- Hands on experience in operating Coil based, Oil based Stress Relieving (SR) on heavy engineering Jobs.
- Witnessing Destructive Testing such as Tensile, Charpy, Bend, Hardness Tests, Metallography etc.
- Familiar with various International Codes and standard like ASME Section II, V, VIII, IX, B31.1, B31.3, ASTM, AWS D1.1, API-1104, API-6A, API-16A, API-16C, API-5LD, SAMSS, SAES etc.
- Hands on experience in Structural, Pipelines, Piping, Wellhead equipment's & Christmas Tree parts such as Adapter, Spacer & Drilling Spools, Tees and Crosses, Rigid Choke & Kill Lines, Buffer Chambers, Test & Blind Flanges, by using techniques of NDE i.e Ultrasonic Testing, Radiography Testing, Magnetic Particle Testing & Liquid Penetrant Testing, PMI (XRF & OES) on cladding/ weld joints and Interpretation of Radiographic Films.

- To conduct NDE inspections of rough, semi-finished & machined components (Castings, Forgings, Welded structures) at various stages as mentioned in QAP, Process sheet/ route card.
 - Radiography Testing in Structural, Piping, Tanks, Pressure Vessels, Horton Sphere, Cross Country Pipelines etc. by using Gamma ray & X-ray.
 - Daily submitting the NDT Reports to client and marking the REPAIR location on the weld joints for re-welding.
 - To perform the surveillance inspection for meeting project specifications, quality procedure requirements, codes and standards, and approved inspection test plan(s).
 - To co-ordinate for NDT activities like RT, UT, MPI, PT, LT, PAUT, TOFD, ECT, IRIS, LFET, MFL, Hydro Test, Heat Treatment for industrial applications.
-

Professional Experience

Aasia Steel Factory Co. Ltd. /
Aasia Breda Industries Company Ltd.

QC Welding, Painting and NDT
Jubail Industrial City, Kingdom of Saudi Arabia
Oct. 2022 – Present

Education

Bachelor of Science in Maths ‘18
Dr. CV Raman University, CG, India

Bachelor of Technology in Mechanical Engineering ‘22
Maharishi University of Information Technology, UP, India

PROFESSIONAL CERTIFICATIONS

CSWIP 3.1 Welding Inspector (TWI)
BGAS Gr. 2 Painting Inspector (TWI)
QMS ISO 9001:2015 Lead Auditor (CQI & IRCA)
NDT Level II UT, RT, MT, PT, VT & RTFI (SNT-TC-1A)

PERSONAL ATTRIBUTES

- Dedicated and Ambitious
- Critical Thinker with Analytical Approach
- Problem Solver, Supportive & Team Player
- Self-Starter, Responsible & Motivated Individual
- Honest, Flexible, Result Oriented & Smart-working

SOFT SKILLS

- Microsoft Office Suit, ERP's, etc.
-
