Language Skills

- Sindhi (Native)
- Urdu (National)
- English (B2 level)

Technical Skills

- Mechanical Testing of Materials
- Metallography
- Advanced characterization
- Non-Destructive Testing
- Corrosion Testing

SOFTWARES

- Microsoft Office
- Ansys software
- SAP-HANA
- AutoCAD

STRENGTHS

- Interpersonal Skills
- Teamwork and Team Leadership
- Project-management

ABOUT ME

I am a versatile engineer with experience spanning research and industry, including roles as a Production Executive Engineer in steel manufacturing and a freelance research assistant in materials and mechanical engineering. I have contributed to diverse projects, from metallurgical process improvement to nanomaterial synthesis, and I am passionate about bridging the gap between research and industry to tackle real-world challenges through sustainable and practical engineering advancements.

WORK EXPERIENCE

07/02/2022 – Current Karachi, Pakistan

Executive Engineer: Aisha Steel Mill Limited

- Process Improvement:** Collaborate with team members to develop strategies aligned with Lean Manufacturing principles for enhancing production efficiency, reducing costs, and eliminating waste.
- Resource Optimization:** Strategically allocate raw materials, equipment, and workforce to maintain seamless production operations, ensuring efficient resource utilization.
- Workplace Organization:** Implement and sustain 5S practices to maintain a clean, organized, and safe working environment, fostering operational excellence.
- Safety and Compliance:** Develop and enforce safety protocols prioritizing employee well-being, while actively identifying, documenting, and addressing unsafe practices.
- Production Control:** Monitor and regulate rolling parameters through Human Machine Interface (HMI) systems and manage production orders and consumables using SAP for accurate and efficient control.
- Reporting and Analysis:** Prepare detailed reports, including production summaries, inventory levels, downtime analysis, and waste metrics, to support informed decision-making.
- Innovation and R&D:** Drive R&D initiatives to explore process improvements, enhance product quality, and implement cost-saving innovations, ensuring continuous growth and development.
- SAP Management:** Create and manage **production orders** and **consumable reservations** using SAP to ensure streamlined inventory control and efficient production workflows.

12/01/2021 – CURRENT Pakistan

Freelance Researcher & Consultant Upwork, Fiverr

- Provided expert consultation and technical writing services in **metallurgy, materials engineering**, and related disciplines to diverse global clients.
- Conducted comprehensive **research and analysis** on material performance, corrosion studies, and advanced material characterization.
- Delivered high-quality academic editing, literature reviews, and technical reports tailored to meet client-specific requirements.
- Collaborated with industries to develop practical, sustainable solutions for enhancing material durability and performance.
- Tutored and mentored students online in engineering topics, including material science and mechanical systems.

10/01/2022 – 25/01/2022 Karachi, Pakistan

Intern- Non-Destructive Testing (NDT) Velosi Integrity & Safety

- Assisted in **Non-Destructive Testing (NDT)** tasks, including ultrasonic (UT) and radiographic testing (RT), to evaluate industrial assets.
- Gained exposure to **API standards** and their applications in industrial integrity and safety assessments.
- Developed foundational knowledge of **ASNT certification requirements** and industry best practices in NDT operations.
- Collaborated with professionals to analyze test results, identify defects, and ensure compliance with safety regulations.

10/12/2021 – 10/01/2022 Karachi, Pakistan

Intern – Steel Manufacturing Agha Steel Industries, Limited

- Gained hands-on experience in the **manufacturing of steel rebars** at a state-of-the-art facility employing advanced production technologies.
- Observed and supported key processes, including **melting, rolling, and quality control**, ensuring compliance with industry standards.
- Enhanced understanding of steel manufacturing workflows, plant operations, and modern techniques for improving product efficiency.

EDUCATION AND TRAINING

23/10/2017 – 01/12/2021 Jamshoro, Pakistan

Bachelor of Engineering (Metallurgy & Materials Eng.) Mehran University of Engineering and Technology

Website <https://www.muett.edu.pk/> | CGPA 3.60 / 4.00

Hyderabad, Pakistan

Advanced Product Design & CAM Hyderabad Engineering Support Centre (HESC)

Website <https://tusdec.org.pk/hesc/>

Materials Data Sciences and Informatics Georgia Institute of Technology

Website <https://www.coursera.org/learn/material-informatics>

AI Materials Korea Advanced Institute of Science and Technology

Website <https://www.coursera.org/learn/ai-materials>

RESEARCH WORK

Experimental Study of Corrosion Inhibition of Carbon Steel in Acidic Environment Using Natural Guar Gum

Link <https://doi.org/10.21203/rs.3.rs-2524306/v1>

Corrosion Inhibition Study of Onion Extract on Mild Steel in acidic and alkaline Environment

Link <https://www.pjaec.pk/index.php/pjaec>

Development of Cobalt Metal based Phosphates for HER/OER electrocatalytic activity. (In progress)

HONOURS AND AWARDS

Higher Education Commission, Pakistan

HEC Merit Based Scholarship

Higher Education Commission, Pakistan

PM Laptop Scheme

EXTRACURRICULAR ACTIVITIES

28/02/2023

● **Health & Safety Environment Management in Construction Industry**

17/03/2023

● **Digital Transformation**

28/07/2021 – 29/07/2021

● **1st International Symposium on Advanced Materials & Emerging Technologies (ISAMET'21)**

Presenter

28/05/2021

● **Corrosion Engineering as a Profession**

24/05/2021

● **2nd IEEE Students Professional Awareness Conference**

22/02/2020 – 23/02/2020

● **National Project Competition Pakistan (NPC'19)**

04/02/2020 – 07/02/2020

● **MUET Sports Week 2020**

21/10/2019 – 25/10/2019

● **16th International Symposium on Advanced Materials (ISAM'19)**

03/12/2019

● **International Miners Day 2019**

RECOMMENDATIONS

● **Dr Muhammed Ishaque Abro** Professor

Azmat demonstrates exceptional technical expertise coupled with strong problem-solving and management skills, making him well-suited for leadership roles in his batch.

Email ishaque.abro@faculty.muett.edu.pk

Phone (+92) 3332705953

● **Dr. Ali Dad Chandio** Associate Professor

His dedication to continuous learning and ability to work collaboratively with diverse teams position him as a promising professional in the field of materials and mechanical engineering.

Email alidad@neduet.edu.pk

Phone (+92) 3008255967

● **Dr. Umair Aftab** Professor

Azmat demonstrates exceptional technical skills and research aptitude in materials engineering, delivering innovative and impactful results.

Email umair.aftab@faculty.muett.edu.pk

Phone (+92) 3332708255
