Profile:

- To best utilize and enhance my skills towards a challenging career in growth oriented and leading edge organizations which match with my knowledge and interests that would facilitate my personal growth and satisfy employer's objectives and needs.
- 3 years experienced in construction of 132/33/13.8 kV substation as an Electrical & Testing Commissioning Engineer.

Skills:

- | | |
|-------------------|---------------------|
| • Communications | • Management |
| • Problem Solving | • Handling Pressure |
| • Adaptability | • Leadership |

Work Experience :

Pa Cost International Company (Saudi Arabia)

April 2022-Present

- Testing & Commissioning (open Loop & closed Loop test) of GIS BCU & Switchgear BCU, Protection signals, command, Indications & measurement as per SAS signal list.
- Worked on Schemes check (Function test) at LCC & Protection panels up to 132KV.
- Perform scheme and functional testing of inter-trip panels such as Circuit Breaker Failure, Busbar Protection, Line Protection, Transformer protection and tripping matrix in load shedding and monitor testing of mechanical and electrical interlocking schemes.
- Testing of the mechanical protections of transformer to ensure alarms and BF low current initiation in C&R panels (Buchholz relay, oil, winding temperature and PRV).
- Scheme & Function check for C&R (control & relay) panel for Transformer Protection, Busbar Protection, Line Protection and Synchronizing Scheme.
- Having Command on Function Test for ACDB & DCDB.
- Ability to read and understand grid station control and protection drawings.
- Ability to perform CT Primary & Secondary Injection for 13.8/33/115/132KV.
- Ability to perform TR & BB Stability Test.
- Experienced in Fault investigation and reporting.
- Having experienced on testing & Site Acceptance for different type of relays like over-current, over voltage, under Frequency relays .
- Experienced multiple Test Sets like TTR330, TM1800, MTO300, MIT525, EGIL, VIDAR, MOM, B10E, Omicron CPC/ CP100, Sverker, SMRT, MRCT analyzer, FREJA, Fujikura 70S, Primary Injection PCITS2000/2.

Projects Experience :

1. New Urayirah 115/13.8 KV Substation-Urayirah_EOA.
2. Al-Tawdhiyah-2 132/33KV Substation No.8725- Riyadh_COA.
3. Qiran Housing 132/13.8KV Substation -Riyadh_COA.
4. Construction of Munsiyah 132/13.8KV -Riyadh_COA.
5. 38CD Substation 33/13.8KV- AL-Jubail_EOA.

Education:

**Bachelor (Honor's) In Electrical & Electronics Engineering
(2017-2022)**

National University, Khartoum, Sudan.

Project: Waste Energy to Biogas. Project Grade: Excellent.

Graduation Grade: Good.
