Subject: Application for Required Position

I am writing to express my interest in the Quality Assurance position at Peoples Steel Mills. With 9 years of comprehensive experience in the Steel sector, including 3 years in cold rolling and 6 years in alloy rolling, I am confident in my ability to contribute to your esteemed team. My expertise encompasses the inspection and testing of deformed bars, round bars, and flat bars, as well as an in-depth understanding of steel grades and merging steel processes. At Peoples Steel Mills, I have developed and implemented rigorous quality control procedures. My responsibilities include supervising heat treatment processes, conducting mechanical testing, and performing detailed dimensional and surface inspections. I ensure that all products meet the highest quality standards, particularly in the context of round bars, deformed bars, and flat bars. My work involves meticulous verification of billet specifications before hot rolling and thorough monitoring of furnace temperatures during the process.

In addition to my technical skills, I oversee the pickling and polishing processes in cold drawing operations, ensuring strict adherence to quality protocols. I am proficient in conducting non-destructive testing (NDT), including magnetic particle testing, to identify material defects. This experience enables me to confidently declare materials as accepted or rejected based on comprehensive observations and stringent testing criteria. Effective material handling and inventory management are also key aspects of my role. I have successfully managed workforce allocation to maximize productivity while maintaining high safety and quality standards. My ability to ensure accurate instrument calibration is crucial for maintaining the reliability of testing results and product integrity.

Throughout my career, I have prepared detailed reports on production efficiency, rejection rates, and quality metrics, driving continuous improvement initiatives. I have also worked collaboratively with departments such as Melt Shop, Laboratory, Production Planning and Control (PPC), and Marketing to ensure seamless operations and alignment with organizational goals. I am particularly impressed with Peoples Steel Mills commitment to innovation and excellence in the steel industry. I am eager to bring my technical expertise, dedication to quality, and collaborative spirit to your team. I am confident that my experience and skills align well with the requirements of the Quality Assurance position and that I can make a significant contribution to your company's success.

Thank you for considering my application. I look forward to the opportunity to discuss how my background, skills, and experiences can contribute to the continued success. Please feel free to contact me to arrange a meeting.

*Sincerely,
Malik Abdul Azeem*

EDUCATION

**Metallurgical Training
Centre, Karachi, Pakistan**
**Metallurgy and Material
Science**

Diploma of Associate Engineering
2012 – 2015

EXPERTISE

- Ability to read and understand ASTM & API Standards
- Familiar with NDT methods
- Strategic Planning
- Critical Thinking
- Communication Skills
- Digital Marketing
- Negotiation

COMPUTER SKILLS

- Proficient in MS-Office
- SAP Data Management and Entry
- Expertise in Google Sheets and Spreadsheet Application.
- Familiarity with statistical analysis software
- Technical troubleshooting and issue Resolution

PROFILE

As a Quality Assurance Executive at People's Steel Mills Ltd., Karachi, I spearhead quality improvement initiatives, lead cross-functional teams, and ensure the timely execution of projects. Leveraging strong technical expertise and leadership skills, I act as a catalyst for change, driving continuous improvement and aligning personal achievements with organizational objectives. I am now seeking a challenging role that fosters skill development, innovation, and contributes to both professional growth and the success of the organization.

WORK EXPERIENCE

Peoples Steel Mills (Seamless Pipe Mill) Sep 2018 – Present

Position: Junior Executive Quality Assurance and Development

- Performed thorough dimensional and surface inspections (online and final) of finished products.
- Demonstrated expertise in the inspection and testing of round bars, deformed bars, and flat bars to meet stringent quality standards.
- Monitored furnace temperatures during hot rolling operations, ensuring optimal thermal conditions for material processing.
- Verified billet quality prior to hot rolling to maintain consistency in product output and prevent downstream defects.
- Supervised heat treatment processes and conducted mechanical testing to ensure compliance with technical specifications.
- Oversaw pickling and polishing processes during cold drawing to achieve superior surface quality and precision in material properties.
- Conducted Magnetic Particle Inspection (MPI) on round bar pieces to detect surface and subsurface defects, ensuring product integrity.
- Assessed and declared materials as "Accepted" or "Rejected" based on comprehensive quality observations and adherence to standards.
- Inspected incoming raw materials at the company's store, ensuring conformity to specifications and preventing material wastage
- Managed material handling and balancing operations, streamlining workflow efficiency and reducing operational bottlenecks.
- Led manpower management and calibration of instruments to maintain production accuracy and uphold operational standards.
- Generated detailed reports (monthly, quarterly, yearly) covering rejection analysis and production yield analysis for continuous performance improvement.

- Facilitated cross-functional coordination with Melt Shop, Laboratory, Production Planning & Control (PPC), and Marketing departments to ensure seamless operations.
- Played a critical role in the commissioning and erection of bar rolling mills, contributing to successful project execution.
- Contributed to the successful development of deformed bar A706/615 via the Thermo-Mechanical Treatment (TMT) process, enhancing product strength and ductility.
- Extensive knowledge of various steel grades and international standards, ensuring global compliance and market acceptance.
- Provided on-site inspection and quality assurance during the initial stages of production to ensure strict adherence to technical requirements.
- Delivered technical support to clients, offering expertise to address product queries, resolve issues, and meet customer expectations.
- Engaged in vendor rolling projects for major clients such as Agha Steel and Amreli Steel, ensuring precise alignment with client specifications.
- Implemented Total Quality Management (TQM) and 5S methodology to enhance workplace efficiency, reduce waste, and improve product quality.
- Conducted tensile testing of deformed bars to evaluate mechanical properties such as yield strength, ultimate tensile strength, and elongation, ensuring compliance with ASTM, ISO, and other relevant standards.

Aisha Steel Mills Ltd

August 2015 – August 2018

Position: Junior Quality Assurance and Control Inspector

- Conducted thorough inspection of raw materials, including Hot Rolled Coils, Pickled Cold Rolled Coils, and Skin Pass Coils, ensuring adherence to quality standards.
- Performed final inspection and grading of Cold Rolled Coils as per JIS G-3141 standards, ensuring compliance with dimensional, mechanical, and surface quality requirements.
- Proficient in using advanced testing equipment such as Micro Vickers, Vickers, and Webster Hardness Testers, as well as Cupping Testing Machines, Ultrasonic Thickness Testers, and Roughness Testers for comprehensive material evaluation.
- Inspected grinding and shot blasting rolls to ensure quality assurance and maintain consistent surface finish during processing.
- Performed Dye Penetrant Testing (DPT) on batch-type furnace weld joints to detect surface cracks and ensure weld integrity.
- Collaborated closely with the production department to troubleshoot and resolve process-related issues, minimizing downtime and improving productivity.
- Managed SAP data entries and maintained detailed inspection reports for traceability, accuracy, and compliance with quality management systems.
- Supervised the inspection of coil packing to verify dimensional accuracy and ensure adequate corrosion protection during storage and transportation.
- Conducted conductivity and pH tests on Reverse Osmosis (R.O.) water samples to ensure compliance with process specifications and prevent contamination.
- Performed chemical composition testing of emulsion and HCL in pickling tanks to maintain process control and optimize material surface treatment.
- Conducted tensile testing of cold-rolled coils to evaluate mechanical properties such as yield strength, tensile strength, and elongation, ensuring compliance with ASTM, JIS, and other relevant international standards.

Roll No: 71092

Serial No: 061518

Registration No: 001-2013-01316-18

SINDH BOARD OF TECHNICAL EDUCATION, KARACHI

DIPLOMA OF ASSOCIATE ENGINEER

Session : 2015

This is to certify that Mr. / Mrs. / Miss **Malik Abdul Azeem**

Son/ Daughter of **Malik Muhammad Afzal**

of **Metallurgical Training Centre, Pakistan Steel, Karachi**

has successfully completed the **THREE-YEAR PROGRAMME** of instructions in

Metallurgy & Material Science

Technology in the month of October, 2015 and secured 2152 Marks out of

3350 and has been placed in B Division/ Grade.

In recognition thereof this

Diploma of Associate Engineer

is awarded at Karachi on the 25th day of the month of July, 2024

CONTROLLER OF EXAMINATIONS
