

Ahmed Mohamed Hakem Gadelrab

suez , Egypt ■ Ahmed.hakemm88@gmail.com L (+20)1062550707

SUMMARY

Mechanical Power Engineer with solid academic foundation and hands-on industrial training across steel manufacturing and oil processing environments. Experienced in basic mechanical maintenance, rotating equipment fundamentals, welding awareness, hydraulic systems, and NDT concepts. Safety-focused, detail-oriented, and eager to contribute to maintenance, industrial, and energy-sector operations within a professional engineering team.

EXPERIENCE

Quality control Engineer

April 2026 – Present, Suez, Egypt

Petrojet suez central work shop

- Inspecting welding activities according to approved welding procedures and quality standards.
- Performing visual inspection and coordinating NDT activities for welded joints.
- Reviewing welding documentation, WPS, PQR, and welder qualifications.
- Ensuring compliance with QA/QC requirements and project specifications.
- Preparing inspection reports and maintaining quality records.
- Monitoring fabrication and repair works inside the workshop.
- Coordinating with production and welding teams to solve quality issues.
- Following safety and quality regulations during inspection activities.

Quality control Engineer

January 2026 – April 2026, Suez, Egypt

National steel fabrication company

Welding Inspection

- Inspect weld joints before, during, and after welding.
- Verify joint preparation, fit-up, alignment, and cleanliness.
- Monitor welding parameters (current, voltage, heat input).
- Ensure correct filler materials are used.

EDUCATION

Bachelor of Mechanical Power Engineering

Faculty of Engineering, Suez University – Suez, Egypt

Sep 2019 – Jun 2024

- Overall Grade: Very Good (78.62%) with Honors
- Graduation Project: Excellent

INDUSTRIAL TRAINING & INTERNSHIPS

Ezz Steel – Mechanical Engineering Internship

Aug 2022 – Sep 2022

- Gained practical exposure to industrial mechanical systems and maintenance activities.
- Observed operation and maintenance of pumps, gears, bearings, and production equipment.
- Developed strong awareness of safety procedures and industrial work standards.

Suez Oil Processing Company – Mechanical Internship

Jul 2023 – Aug 2023

- Trained on mechanical equipment operation and preventive maintenance practices.
- Observed maintenance activities within oil processing facilities.
- Learned safe work practices and basic troubleshooting methods.

Indorama Company – Assistant Intern

Jun 2021 – Feb 2022

- Assisted engineering teams with daily operational and technical tasks.
- Supported documentation, reporting, and basic equipment follow-up.
- Gained exposure to industrial discipline and plant operations.

ENGINEERING PROJECTS

Humidification–Dehumidification Desalination System

Graduation Project – Jul 2024

- Studied and designed a seawater desalination system using humidification–dehumidification technology.
- Focused on improving system efficiency and reducing energy consumption.
- Applied thermodynamics and heat transfer concepts to practical engineering design.

CERTIFICATIONS

- **NDT II ASNT**
 - NDT inspector level II (nondestructive test) for welding areas and any critical area by five methods
- **Siemens Energy Technical Courses:**
 - **Pumps, Gears, and Bearings**
 - **Welding Technology**
 - **Basics of Hydraulic Systems**

SKILLS

- **Mechanical Maintenance Fundamentals**
- **Rotating Equipment Basics**
- **Welding & Fabrication Awareness**
- **Hydraulic Systems Basics**
- **Safety Procedures & Industrial Standards**
- **AutoCAD**
- **SolidWorks**
- **MATLAB (Basic)**
- **Microsoft Excel, Word, PowerPoint**

LANGUAGES

- **Arabic – Native**
- **English – Excellent**
