CAREER OBJECTIVE

Experienced Quality & Operations Engineer with 3 years in manufacturing and materials industries, ensuring process efficiency, product reliability, and compliance with ISO standards. I am skilled in quality control, defect analysis, and NDT, alongside production planning, resource optimization, and lean manufacturing implementation. Adept at rolling operations, process monitoring, and continuous improvement to enhance safety, cost-effectiveness, and quality assurance.

WORK EXPERIENCE

Executive Engineer, Aisha Steel Mill

Feb'2022 - present

- **Inspection Coordination:** Led personnel for mechanical and non-destructive testing (NDT), including hardness, tensile, bending, spectrometry, ultrasonic, and dye penetrant testing (DPT) per ASTM standards, ensuring defect identification, resolution, and compliance.
- **Quality & Compliance Management:** Ensured adherence to ISO 9001:2015 and ISO 14001:2015 standards. Applied 7QC Tools for defect analysis and process improvements. 2021-2022
- **Performance Monitoring:** Tracked and analyzed KPIs (defect rates, yield rates, cycle times), identifying opportunities to optimize production efficiency and reduce waste.
- **Reporting & Data Analysis:** Prepared comprehensive reports on mechanical testing, defect analysis, and compliance, driving data-driven decisions and cross-functional improvements.
- **Production & Inventory Management:** Utilized SAP for production planning, inventory control, and order tracking, ensuring accurate resource allocation and seamless operations. Maintained test material inventory.
- **Operational Leadership & Lean Implementation:** Managed on-floor and on-line operations, emphasizing 5S audits, Lean Manufacturing, and defect isolation to enhance process efficiency.
- **Team Development & Customer Relations:** Conducted team building and quality training programs. Addressed customer complaints, improved satisfaction, and implemented preventive measures.

Internee, Velosi Integrity & Safety

Jan'2022

- Assisted in Non-Destructive Testing (NDT) tasks, including ultrasonic (UT) and Magnetic Particle testing (MPT), to evaluate industrial assets.
- Gained exposure to API standards and their applications in industrial integrity and safety assessments.
- Developed foundational knowledge of ASNT certification requirements and industry best practices in NDT operations.

Internee, Agha Steel Industries.**Dec'2021-Jan'2022**

- Gained hands-on experience in steel rebar manufacturing at a state-of-the-art facility, focusing on advanced production technologies.
- Assisted in key processes such as alloy addition during casting, optimizing rolling parameters, and ensuring stringent quality control compliance.
- Conducted inspections of refractory linings and contributed to alloy calculations to achieve desired material properties.

EDUCATION

B.E Metallurgy & Materials Engineering
Mehran UET, Jamshoro.

CGPA 3.60/4.00
Oct'2017-Dec'2022

SKILLS

Mechanical Testing
Non -destructive Testing
Quality Control & Assurance
Troubleshooting

MS office
SAP HANA S4
Data Analysis & Reporting
Customer Relationship Management
