Personal Details

- Nationality : Nigeria; Male

Projects

- Escravos Gas-to-Liquids Project**
Client : Chevron Nigeria Ltd
Contractor :SGS
Mar 2010-April 2013
- Egina Subsea Umbilical Riser and Flowline**
Client : Total Energies
Contractor :Saipem Offshore
Dec 2016- Jan 2018
- Egina FPSO Project (Commissioning)**
Client:Total Energies
Contractor : IOTA-Group/Prime Atlantic Cegelec (PACE)
Jan. 2018-Aug 2018

Education

- Petroleum Training Institute PTI (Nigeria)** 9 May, 2010
Electrical and Electronic Engineering Technology (High National Diploma HND)
2.70/4.00 (Lower Credit)

Objective

Instrumentation Technician with 12 years of experience across oil & gas, petrochemical, chemical, manufacturing, and maritime industries. Proven track record in construction, installation, troubleshooting, repair, commissioning, and supervision of instrumentation systems. Skilled in leading teams, coordinating multi-disciplinary activities, and delivering complex world-class projects including Escravos GTL, Egina SURF Development, and Egina FPSO Commissioning. Adept in ensuring compliance with international standards, maintaining plant reliability, and supporting operational excellence.

Interests

- Instrumentation Supervisor

Experience

- MODERN CHEMICAL AND SERVICES COMPANY(SAUDI ARABIA)** 10 December 2024 - Present
Electrical and Instrumentation Maintenance Technician
Key Responsibilities:
*Perform preventive and corrective maintenance on electrical and mechanical systems including:
Diesel engine generators
Industrial air compressors
Material handling equipment (e.g., forklifts)
Automatic coiling machines and other production line equipment
*HVAC systems and air conditioning units

Facility and outdoor lighting systems

Troubleshoot, diagnose, and repair electrical and instrumentation issues using appropriate tools and techniques.

*Inspect and test system components, using test equipment and hand tools, to locate the cause of a breakdown or malfunction.

*Read and interpret technical diagrams, schematics, and maintenance manuals.

*Ensure all maintenance activities comply with safety and quality standards.

*Maintain detailed records of maintenance work and equipment performance.

*Collaborate with other technicians and production personnel to improve equipment reliability.

*Support installation and commissioning of new equipment as required.

- **AFRICAN INDUSTRIES GROUP AIG (NIGERIA)**

30 September 2024 - 30 November 2024

Instrumentation Supervisor

Supervised a team of technicians during construction, installation, and commissioning of instrumentation systems.

Coordinated daily work schedules, toolbox talks, and compliance with project HSE standards.

Oversaw loop checking, functional testing, and integration of DCS/PLC/SCADA systems.

Liaised with project engineers, vendors, and clients to ensure timely project delivery.

Mentored junior engineers and technicians to improve technical skills and productivity.

- **DANGOTE FERTILISER COMPANY LTD (NIGERIA)**

14 June 2022 - 30 Sept 2024

Instrumentation Engineer

Provided engineering support for instrumentation design, procurement, and installation activities.

Prepared instrument data sheets, technical specifications, and supported vendor package reviews.

Participated in FAT (Factory Acceptance Tests) and SAT (Site Acceptance Tests) for instrumentation systems.

Collaborated with multidisciplinary teams during construction and commissioning phases.

Supported maintenance team in resolving instrumentation issues to minimize downtime.

- **Drydocks World Dubai (DUBAI, UAE)**

04 July 2019 - 30 August 2020

Electrical and Instrumentation Marine Technician Foreman

Installed, calibrated, and tested process instruments including transmitters, flowmeters, and control valves.

Conducted loop checks, pre-commissioning, and commissioning of field devices in oil & gas projects.

Assisted senior engineers in troubleshooting instrumentation faults and supported plant operations.

Ensured compliance with safety procedures (PTW, LOTO, HSE standards).

Maintained accurate documentation of installation, calibration, and test records.

- **IOTA-Group /Prime Atlantic Cegelec**

01 Jan 2018 - 31 August, 2018

Instrumentation Commissioning Technician

Review project design documents, P&IDs, loop diagrams, and instrument data sheets to ensure compliance with project standards.

Participate in HAZOP and design review meetings to identify commissioning concerns.

Verify installation works according to engineering drawings and specifications.

Perform pre-commissioning checks including continuity, insulation resistance, loop testing, and calibration of field instruments (pressure, temperature, flow, level, etc.).

Carry out logic verification, interlock testing, and cause & effect matrix validation.

Configure, test, and troubleshoot PLCs, DCS, and SCADA systems to ensure proper integration.

Coordinate with Electrical, Mechanical, and Process teams to ensure smooth system handover.

Interface with vendors for FAT (Factory Acceptance Test), SAT (Site Acceptance Test), and troubleshooting.

Liaise with QA/QC and HSE departments to ensure compliance with safety and quality standards.

Prepare commissioning dossiers, calibration certificates, loop folders, and as-built documentation.

Maintain daily progress reports and update commissioning punch lists.

Ensure proper sign-off of pre-commissioning and commissioning check sheets.

Support operations team during performance testing and plant start-up.

Provide technical guidance and on-site training for maintenance and operations personnel.

Participate in final system acceptance and handover to client.

- **Lesenergy Nigeria Ltd**

23 November 2016 - 01 January, 2018

Electrician

Install new wiring, lighting systems, power distribution panels, and electrical equipment on ships.

Fit navigation and communication equipment.

Install motors, generators, and control systems.

Perform routine inspection and preventive maintenance of electrical systems.
Repair faulty wiring, lighting circuits, power systems, and control boards.
Replace damaged cables, connectors, and electrical components.
Diagnose electrical faults using testing tools (multimeters, megger, oscilloscopes).
Identify issues in generators, motors, battery systems, control circuits, and automation systems.

Skills

- Calibration, LOTO, Electrical System Design 2.Instrumentation and Control Systems PLC/DCS Programming and Troubleshooting 3. Loop Checking and Commissioning 4.Electrical Drawings and Documentation 5.Industry Standards and Safety Codes (IEC, ISA, NEC) 6.Maintenance and Fault Diagnosis 7.Instrument Calibration and Validation
- Core Skills Instrumentation Installation & Commissioning Preventive & Corrective Maintenance Troubleshooting & Repairs of Instrument Systems Calibration & Testing of Field Instruments (Transmitters, Control Valves, RTDs, etc.) DCS, PLC & SCADA Systems Loop Checking & Pre-Commissioning Activities Technical Documentation & Reporting Leadership & Team Supervision Health, Safety & Environment (HSE) Compliance Strong Communication & Collaboration Skills

Achievements & Awards

- Certifications OSHA / HSE Certification (if applicable) Instrumentation & Control Systems Training Permit to Work (PTW) / Safety Passport

Current Location

- Saudi Arabia, Somman (Eastern Province)

Visa Status

- Valid

Willingness To Relocate

- Yes.
