

Name: Zbigniew Walenciak
Address: ul. Mickiewicza 48/21, 28-200 Staszów, Poland
Mobile Number: +48 501205873
Email Address: zwalenciak@interia.pl (alternative: fuis@tlen.pl)

PERSONAL STATEMENT

QC/QA Inspector (Mechanical engineer, Welding inspector, Supplier's Auditor, Document Controller etc.) with long experience and relevant knowledge in metallic fabrication (carbon and low alloy steel-CS, stainless steel – SS etc.) including machining, welding, heat treatment, bending, forming, surface protection – painting, galvanizing, NDE/NDT examination, hydrostatic test, leakiness test, IAT & FAT attendance etc. Moreover inspected some others materials as wooden parts, refractory materials, electrical fittings and chemicals shipment as. Above were practised for steel structures (e.g. systems of ducting, supports, silos, tanks, columns, handrails etc.), pressure parts (pumps, vessels, boilers, pipelines and exchangers) and more others noted in details below for the following branches: power engineering, gas & oil industry, offshore, subsea, onshore, RES etc. and moreover at mill factories (pipelines) and nuclear industry (forgings). Totally have been performed inspections for over than 180 projects including ab. 30 projects as a resident surveyor or expeditor.

Scope of inspection includes as example the documentation review, surveillance of materials stocked, fabrication processes, testing attendance, FAT witness, shipment, NCR's status, expediting, reporting of manufacturer's activities etc.

KEY SKILLS**Technical Skills & Personal Skills**

- Relevant knowledge of all phases of the construction and inspection process including pre-fabrication meeting - PIM, materials traceability check, certificates and documentation review, supervision on the manufacturing phases, participation in destructive and NDE examination, equipment status check, final documentation review and also preparation, protecting and releasing of items to shipment with sufficient reporting of all above to the customer
 - Knowledge of Material Groups and their weldability (carbon steel, C-Mn steel, Fine grained, Stainless steels grades 304/316/321, 9% Ni, Inconel 625 & 825, P91, P92, low alloy steel 0,3Mo & 1Cr÷2.25Cr, boilers steels etc.)
 - Knowledge of supervision over welding processes acc. to EN and ASME and the procedures and methods used for inspection: non-destructive examinations of welds and materials (RT, UT, PT, MT, VT, PMI, HT, LT) and destructive testing (tensile test, impact test, hardness test, chemical analysis, FATT, DWTT, bending test etc.)
 - Supervision of proceeding according to ITP / QCP for fabrication and testing (performance test, FAT, running an mechanical tests, hydrostatic tests, tightness/leak test (pneumatic & penetrant), environment check – noise and vibration, load tests, trial assembly, functional tests, roughness check etc.)
 - Experience and knowledge in realization of audits of quality management systems acc. to ISO 9001, ISO14001, OHSAS and relevant integrated systems
 - Equipment and materials expertise (valves, forgings, fasteners-bolts & nuts)
 - Supervision of fireproof building materials (brick, refractory, monolithic, mortars etc.) and furnaces assembled fabricated with lining of refractory materials
 - Supplier's audits (manufacturing in scope of valves, tubes, filler metals, painting shops, skid systems)
 - Inspections on parts and materials fabricated for renewable energy systems (turbine rotors, gear parts, oil lube systems)
 - Inspection activities carried out on the base of different standards and rules as ISO (e.g. 1461), EN (e.g. EN1090-2, EN3183, EN12952, EN13445, EN14015, EN13480, EN6157, EN3834 etc.) and moreover PED, ASME (sec. V, VIII & IX), API, ASTM, DNV, ABS, EEMUA, TEMA, DIN18800, VGS, ASTM A962 & E 1444 , NORSOK, IEC etc.
 - IT package operation – MS Office, internet, PDF files, scanning,
 - Foreign languages: English – communicative, Russian – basic , Czech - basic
 - Driving license
 - Clearance and precision in actions, assurance of requirements maintain, detailed reporting
 - Availability to travel and abroad inspections (on short time)
 - Personal portable set of inspection instruments if necessary for some test – on request.
-

CERTIFICATES & MEMBERSHIPS

- PT level 2, (Welding Institute in Gliwice – certif. no PT2/17039/2021/0)
- MT level 2, (Welding Institute in Gliwice – certif. no MT2/16995/2021/0)
- International Welding Inspector /Comprehensive Level - Welding Institute in Gliwice – certif. no PL-IWI-C-264/2012
- VT level 2, (Welding Institute in Gliwice – certif. no VT2/2878/2010/0)
- Lead Auditor ISO 9001 (BVQI – IRCA certif. no LA2/04/PL/6573)
- Welding QA/QC course – Welding Institute Gliwice, certif. no 15/I/94
- Internal auditor of Integrated Management Systems (IMS) acc. to ISO 9001, 14001 and PN18001 (OHSAS) – Bureau Veritas cert. INT-IMP/2004
- Internal auditor of laboratory – Simptest Poznań cert. 4651/94
- UT course of material and welds testing – Simptech Opole cert. No 4/1
- Course of the energy auditor of buildings energetic certification – cert. No 480/LIR/AE/PK-RZ7
- BV calibration courses
- Course of balancing for rotating devices – RODiDK Bytom cert. 835/86
- Fluor certificates SQS006, SQS007, SQS008, SQS010 & SQS011

EDUCATION

- AGH University of Science & Technology, Cracow – Technology of Machinery Construction, **Mechanical Engineer**
- Technical College of Mechanical, Staszów – **Technician of machining**

EMPLOYMENT and EXPERIENCE

Mechanic of turbines, boilers refit / Vibrodiagnostic Technician – Zakłady Remontowe Energetyki Lublin (Power Plant Repair Company- dep. in Połaniec) – since 1983 to 1991 and Energoremont Ltd. in Połaniec from 1991 to 1992

- repair of elements of turbine and auxiliary devices (rotors, pumps, pipelines) and in repair of boiler pressure and non-pressure elements (pipelines, coils, fans, mills, feeders, ducts etc.)
- balancing of rotating equipment (static and dynamic) – rotors of steam turbine, air and gas fans, pumps, shafts etc.

Quality Control Manager / NDT Laboratory Manager and parallel as Plenipotentiary of Quality System – Enrem Ltd – Połaniec, since 1992 to 1998

- managing of quality team and NDT laboratory personnel with quality assurance system
- supervision of works and testing of machinery production, repairing and/or assembly of turbines and boilers parts
- supervision and verification of welders qualification
- implementation of Quality Management System (ISO9001) and training of personnel for QMS
- NDE testing of steam turbine elements (bolts, shafts, blades etc)

Chief Technological Engineer – Enrem Ltd – Połaniec, since 1998 to 2000

- managing technology of fabrication and repairs of pressure parts and steel structures
- elaboration and supervision of technological documentation (welding spec's, bending proc., machining etc.)
- design of pressure elements and installations and supervision on technology guides (QCP's/ITP.'s)

Chief Mechanic – Dorbud S.A. – Kielce, since 2000 to 2002

- supervising and administration of tools resources, road transport and materials handling, formworks systems, workshops and storage places, managing of logistic the wooden supports
- managing of UDT devices (building cranes, overhead crane, freight and passenger lifts) in scope of assembling, inspection, repair and operation
- co-operation with managers of production and construction, suppliers and service companies,

Self-employed (F.U. Inter-Serwis) – Staszów, since 2002 – still

- NDE testing and witnessing for mechanical parts (shafts, axels, plates, elbows, bolts including of steam turbines, turbine blades, fasteners, fittings etc.) and welds (with VT-visual check, PT- penetrant test, MT- magnetic particle test, LT- leakage test & UT- ultrasonic exam.)
- design and issue of documentation of underground petrol tanks and pipelines

- supervisions (**quality inspection and expediting**) over fabrication and pre-assembling as follows:
 - > the power plant installations (pressure parts, flue and air ducts, steel structures, turbine shafts & rotors, turbine casings, casting carriers, pumps, forgings, seamless pipes, coal pipelines, boiler's piping, boiler wall panels, panel's Inconel cladding, weather damper, SS & CS silencers (boiler materials as 16Mo3, 10CrMo9-10, P91, P92, T24 etc.),
 - > petroleum chemistry systems (reactors, exchanges, vessels, super-heaters etc.) , pipes Inconel 825 (inspection on raw material bright annealed)
 - > oil & gas pipelines, elbows and T-shapes (SAWL and SAWH), valves, lube oil systems
 - > offshore & subsea devices and elements (winches, blocks, cranes, access baskets, casings, roughnecks, oak blocks, down-facings, up-facings, testing frames, dampers etc.) including the fasteners CS (class 5.6 – 12.9) and SS (class A2, A4),
 - > electrical fittings and accessories,
 - > generator's parts (pressure plates),
 - > rail bogie frames , railways
 - > nuclear parts (forgings) - e.g. for HPC, Akkuyu & EL Dabba projects and nuclear equipment (pressure vessels and column of reactor) – NAO project
 - > the lube oil systems (LOS) and forged parts (turbine rotors, gears) for renewable energy systems (RES) – projects for Iberdrola, GE, Siemens, Vestas, Howden
 - > food materials (stainless steel vessels and relevant equipment)
 - > gas & oil skids (carbon and stainless steel, pipelines – hydrotest, FAT's, final inspections)
- attendance during the FAT and IAT tests for offshore and subsea devices (access baskets, roughnecks, HPU, bridge cranes, winches, skids etc.)
- witnessing of the special testing (hydrotest, leak test, load test) of pressure tanks/vessels, pipelines and pressure systems (water, oil)
- technical inspection and expediting of preservation (wooden parts, chemical materials) and pre-shipment of manufactured materials
- management , training and consulting of implementation the management systems acc. std's ISO9001, ISO14001, PN-N18001 (OHSAS) and integrated of above std's as well
- third party or second party audits of quality systems of suppliers and sub-suppliers – steel structure shop, painting shop, welding process, water valves production (ISO 9001, EN3834, ISO 14001, ISO 45001, client check list, industry rules etc.)
- technical expertise of valves, pipelines, forgings, boiler drums and petrol tanks.
- documentation control (review of final documentation – MRB, MDB, Dossier) refer to the specifications and/or standards
- supervisions of automotive machining systems as separators, filters, conveyors, tanks, silencers, pipelines as etc.
- supervision and witnessing of the testing for refractory materials (concrete, bricks, mortars, monolithic) and the refinery heaters with the concrete lining and testing (API 560)
- quality service of open petrol tanks during the building process (testing, documentation, welding surveillance etc.)
- technical supervision of the delivery (unloading and storage system) of the gas pipeline and parts (pipes, elbows, Tee, valves etc.), loading of steel structure for transport and check of parts delivered to assembly (valves, pipes, anchors & bolts, pipe shapes, motors & gears etc.)

Above activities were provided on behalf of the following Customers and Inspection Agency:

ATS, Tecnimont, Fluor Daniel BV, Siirtec Nigi, ICIM, Velosi, ITS, Alstom Power Systems, Khalda Petroleum Co., Jacobs Co., Technip, FATA QPT, Duro Felguera s.a. , Maritime Hydraulics A.S., Aker Solutions, Aker Kvaerner, Mustang Engineering Inc., BP America Inc., SBM, AxTech, Andersen MV, Future Production, Bureau Veritas, Eskom, IBERDROLA, AiB, SPIG, NRG, GE O&G, GE-NP., Intertek, SGS, Kalenborn, HIAK AB, Saipem, CB&I, Enginex, Outotec, Siemens, ADCO, Faudi, MHPS, Carbovac, Vinci, Dekra, Exxon Mobile, SQS Killick, Wood Group, APCO, CASS, Geldof, Andritz Selas, GE Power AB, Arcelor, Tronox, Larsen&Toubro Ind., Sakhaline Energy, Andritz AG, Orano, ABS Consulting, BS Hydro, E-Wood, BASF, Mirjana, Syctom, MCG Middle East, TUV-SUD, HZI, Keya, DDE Inspection, Solvay, Tractebel, Rina, JCE, Metso-Outotec, ADNOC, Applus, GIS, TOYO, Vergaengineering, SPXFlow, Kent, Tekfen etc.

Surveyed Manufacturer's shops were located in Poland, Norway, Czech Rep., Ukraine, Slovakia, Croatia, Germany, Turkey, Greece, Spain, UK (England) & Hungary and can be submitted on the request.

PERSONAL INTERESTS

Hobby: sport, music, DIY, environmental protection
