Summary

I have extensive expertise in welding and non-destructive testing (NDT), as well as in the conformity assessment of static and mechanical pressure equipment, in compliance with local regulations and international standards. Over twelve years of experience in the inspection field have also allowed me to develop solid knowledge of electrical and lifting equipment.

Throughout my career, I have held roles as an inspector and project manager on various in-service inspection assignments, as well as QA/QC site manager during construction phases in the petrochemical industry. I currently serve as a TQR and Technical Manager, primarily within the oil and gas, drilling, and product drilling certification sectors.
