PERSONAL INFORMATION

- **Name:** MUHAMMAD SHAHRUKH
- **Father name:** SAGHEER UDDIN
- **Date of birth:** 08-07-1996
- **Residential address:** R-96 pak kousar town malir extension colony karachi, Pakistan.

CAREER OBJECTIVE

Seeking better opportunities in the field of metallurgy and materials engineering. To work in an organization where I use my skills and knowledge to deliver value added results as well as further enhance my learning and develop my career in the field of metallurgy and materials engineering.

EDUCATION

Year	Institution	Qualification	CGPA / Percentage
2017-2020	Dawood university of engineering and technology	B.E in metallurgy and materials engineering	3.18
2014-2016	Govt. Islamia science college, Karachi.	Intermediate (pre Engineering)	65%
2012-2013	F.J grammar school	Matriculation(science)	72.82%

INTERNSHIP

- Pakistan Machine Tool Factory Ltd.
- International steel Ltd.

EXPERIENCE

I worked at Agha Steel Industries as a **Trainee Engineer** in the Quality Control (QC) Department from September 2021 to July 2023. After successfully completing the training period, promoted to **Executive Engineer**, continuing to work in the Quality Control Department.

Our role and responsibilities:

- Sample testing of EAF, LRF sample, billet and rebar for matching our required composition through the spectrometer.
- Making production weight and daily report.
- Identification of defects and inform to production team in rapidly to making good quality billets.
- Monitoring of Proper billets staking in billet yard.
- Testing(spectrometer testing)of Some other samples coming from company out side.

I am also working in QC department Rolling mill at agha steel industries as a '**Executive Engineer**' from August 2024 to till now

Our role and responsibilities:

- TMT control for different grade making. Such as ASTM A615 (G 60 and G 80), ASTM A706 (G 60) and BS 4449 E Bar 500 (A+B+C).
- Rebar samples are tested using a Universal Testing Machine (UTM) in accordance with ASTM Standard A370.
- Performed hardness testing of in-house mill components using a portable hardness tester to ensure material quality and compliance with required standards.
- Daily testing reports making in excel sheet and SAP portal

SKILLS

- Spectrometer testing in spectro max and spectro lab through out certain process.
- Tensile testing through universal testing machine.
- Microsoft Word, Microsoft power point and Microsoft excel.
- CAD application (Autocad, Creo PTC) in practice.
- Achieved Autocad course certificate from Digi skills.
- Core knowledge of CCM , furnace operations and rolling mill.

FYP PROJECT

- Project title is “EFFECT OF PARTICLE SIZE ON GENERAL PROPERTIES OF $\text{Na}_{0.5}\text{Bi}_{0.5}\text{TiO}_3$ (NBT) LEAD FREE PIEZOELECTRIC CERAMICS”.
