

FAHEEM KHAN

Address: House No. D-361 Street 15 Shareef Colony Landhi
 Karachi Pakistan
 Phone: +92-331-244-6388
 Email: Fk47470@gmail.com

SUMMARY:

I started my career as Lab assistant with 3 years experience then I promoted as Lab Technician in Lead recycling plant + Aluminum Recycling plant and Polymer with 2.5 year experience , and As Technical officer in Carburetor Machine Shop and Surface treatment shop with 2.5 year experience, Recently I worked in lead Recycling plant as Technical Officer.

QUALIFICATION

Degree	Institute	Pass	Grade
D.A.E	M.T.C (Metallurgy)	2016	B

WORK EXPERIENCE

Bilal Metals Pvt ,Ltd.

Nov-2022-Till Now

As Technical Officer in Quality Assurance Department.

- Production Planning of Refine Lead, Antimonial Lead , Customer specific alloys etc.
- Chemical testing of Raw material (Paste, Metallic, Positive Plates, Negative plates)
- Maintain detailed records of inspection findings, including observations, corrective actions, and compliance issues. Prepare comprehensive reports for management and regulatory authorities as required.
- Collaborate with plant managers, supervisors, and employees to communicate inspection results and provide recommendations for improvements in safety and environmental performance.
- Hands-on use of Spectro Lab (LAS-01) all its troubleshooting, calibration and In house maintenance.
- Other instruments used in laboratories like pH meter, TDS meter, Moisture Balance, weighing Scale etc.
- Assist in organizing training sessions for workers to enhance their understanding of safety protocols, handling procedures, and environmental best practices related to lead smelting.

- Continuously seek ways to improve lead smelting processes, safety measures, and environmental practices. Propose and implement corrective actions and improvements where necessary.
 - Conduct risk assessments of lead smelting activities and suggest measures to minimize potential risks and hazards associated with the operations.
 - Monitor production processes to ensure they are running with in specified parameters and meet quality standards. Make adjustments as needed to maintain optimal performance.
 - Conduct regular quality checks on finished and intermediate products to ensure they meet the required specifications. Identify defects or deviations from standards and take corrective actions.
-
- Conduct regular inspections of lead smelting facilities, equipment, and processes to evaluate their Operational efficiency, safety, and compliance with relevant regulations and standards

Atlas Autos (KEIHIN) Pvt. Ltd.
As Technical officer in production department,

July 2020-Nov-2022

Job Responsibilities
Carburetor Machining and Surface Treatment Shop:

- Maintain detailed records of inspection findings, including observations, corrective actions, and compliance issues. Prepare comprehensive reports for management and regulatory authorities as required.
- Production planing of Surface treatment shop.
- Monitoring and record management of Titration of chemicals using in Shop like(TR-175, Chemicleaner 12-D, H₃PO₄ , NaOH)
- Collaborate with plant managers, supervisors, and employees to communicate inspection results and provide recommendations for improvements in safety and environmental performance.
- Assist in organizing training sessions for workers to enhance their understanding of safety protocols, handling procedures, and environmental best practices related to lead smelting.
- Continuously seek ways to improve surface treatment processes, safety measures, and environmental practices. Propose and implement corrective actions and improvements where necessary.
- Prepare sample for SST(Salt Spray Test)
- Conduct risk assessments of lead smelting activities and suggest measures to minimize potential risks and hazards associated with the operations.

- Monitor production processes to ensure they are running within specified parameters and meet quality standards. Make adjustments as needed to maintain optimal performance.
- Conduct regular quality checks on finished and intermediate products to ensure they meet the required specifications. Identify defects or deviations from standards and take corrective actions.

Atlas Metals Pvt. Ltd.

Dec-2015 to June-2020

As Quality Inspector in Quality Assurance dept.

Job Responsibilities

Lead Plant:

- Collect samples of lead materials, scrap, and intermediate products from different stages of the recycling process for analysis.
- Perform various tests and analyses on lead samples, such as chemical composition, moisture content, and other relevant parameters using specialized equipment and standard testing methods.
- Monitor the quality of lead materials throughout the recycling process and ensure they meet the required specifications and regulatory standards.
- Accurately record and document test results, maintaining detailed records of analysis data and observations.
- Communicate laboratory findings and analysis results to plant management and relevant stakeholders.
- Hands on SpectroLab (M-11), Spectro Xepos , Moisture Balance,

Aluminum Plant:

- Collect samples of Aluminum materials, scrap, and intermediate products from different stages of the recycling process for analysis.
- Perform various tests and analyses on Aluminum samples, such as chemical composition, moisture content, and other relevant parameters using specialized equipment and standard testing methods.
- Monitor the quality of Aluminum materials throughout the recycling process and ensure they meet the required specifications and regulatory standards.
- Accurately record and document test results, maintaining detailed records of analysis data and observations.
- Communicate laboratory findings and analysis results to plant management and relevant stakeholders.

- Monitoring Holding furnace and alloying process of Specific Aluminum Alloys.
- Taking K-Molds during casting
- Hands on Spectrolab (M-12), Spectro Xepos, Moisture Balance,

Polymer Plant:

- Daily checking and record of all types of plastic parts and their artwork.
- Prepare the dispatch reports.
- Can operate measuring related lab instrument like Vernier Caliper, Height Gauge, and Depth Gauge etc.
- Keeping and maintaining all data of lab and quality control documents

EXTRA CURRICULAR ACTIVITIES AND SKILLS

- Proficiency in Microsoft Office, Microsoft Excel, PowerPoint and Web Browsing.
- Good interpersonal & Communication skills.
- Self Motivation and ability to learn things quickly.
- Aptitude to manage assigned tasks with responsibility and on time.
- Having a good command on **Urdu** and **English** Typing.
