

WAQAS ELAHI

Mechanical Engineer

Phone: +966557445829

Email: waqassabqi319@gmail.com

Location: Makkah, KSA

Professional Summary

I have a deep passion for mechanical engineering and a strong desire to understand complex mechanical systems. My goal is to design, analyze, and optimize machines and structures while prioritizing sustainability. I am excited to contribute to shaping the world and making a meaningful impact as a mechanical engineer.

Education

BS Mechanical Engineering (2021-2025)

Khawaja Fareed University of Engineering and Information Technology, Rahim Yar Khan

Intermediate Pre-Engineering (2019-2021)

Govt. Post Graduate College Jampur

Certification

- Material Evaluation and Mechanical Testing
- OSHA 48 Hours General Industry

Work Experience

Tamimi Industrial Services Company

- **Client** HADEED
- **Trade** WORK PERMIT RECEIVER(WPR)
- **Duration** 15 Oct 2025 TO 15 December 2025

Orient Ceramica Faisalabad (Trainee Engineer)

June 2025 – Sep 2025

- Assisted in manufacturing process parameters temperature, pressure, flow across the pressing, drying, and firing stages to maintain target tile specifications and ensure consistent quality.
- Collected and compiled daily performance metrics for critical production equipment, contributing to engineering reports used by the maintenance department to prioritize (Planned Preventive Maintenance).
- Collaborated with senior engineers to troubleshoot manufacturing defects and suggest process improvements.

M/S Ammad Construction Co. (Assistant Site Engineer)

Sep 2024 – Apr 2025

- Assists in overseeing site operations, including excavation, material placement, and structural work.
- Coordinates with engineers, contractors, and laborers to ensure smooth workflow and compliance with project plans.
- Monitors material usage, procurement, and inventory management to prevent delays and resolves on-site challenges by coordinating with relevant teams and stakeholders.
- Supports in documentation, including daily logs, work reports, and safety checklists.

Fatima Fertilizer Company Limited (Mechanical Engineer)

Feb 2024 – Aug 2024

- Supervised the production process, ensuring efficiency and quality.
- Assisted in optimizing production workflows to improve productivity and reduce waste & monitored assembly line operations, troubleshooting issues to minimize downtime.
- Maintained technical documentation and prepared production reports.

- Conducted routine condition surveillance on machines using vibration analysis and thermal inspection to proactively identify developing faults, contributing directly to the reduction of unscheduled downtime.
- Adhered strictly to the Permit-to-Work system and Lockout/Tagout procedures for all maintenance activities, demonstrating a strong commitment to industrial safety protocols in high-risk utility areas.

Academic Project

- Designed and fabricated a solar dryer using indirect heating to improve fruit drying efficiency.
- Focused on maximizing heat absorption, insulation, and drying rate.
- Conducted performance testing and data analysis to validate efficiency.
- Designed model using AutoCAD and SolidWorks, performed various analyses using Ansys Workbench.
- Performed successful testing of Dryer on fruits and vegetables to make sure its proper functioning.

HONORS & AWARDS

- Industrial Open House & Career Fair 2025 (Certificate)
- HEC Benazir Undergraduate Scholarship (Phase-III), Government of Pakistan

SKILLS & COMPETENCIES

Software Skills: Solidworks, Auto CAD, MS Word, MS Excel, Ansys

Hard Skills: Hazard Identification, Investigation, Inventory Management

Interpersonal Skills: Risk Assessment, Effective Communication, Proactive, Teamwork, Time Management, Adaptability, Collaborative, Report writing

Language Proficiency: English, Urdu
