

HASSAN ATTIQUE

Pakistan | +92 349 7409970 | hassanattique78@gmail.com

CAREER SUMMARY:

Skilled materials engineer with a strong background in materials science and engineering. Possesses a deep understanding of various materials, their properties, and applications across industries. Proven track record in developing innovative materials solutions, optimizing material selection processes, and driving improvements in product performance and reliability

EDUCATION:

Bachelors of Science in Material Engineering Ghulam Ishaq Khan Institute of Engineering Sciences and Technology CGPA: 2.86	09/2018 - 07/2022 Topi, Pakistan
Intermediate (FS.c) Pak Turk Marif Islamabad, Pakistan Marks: 871/1100	04/2016 - 04/2018

WORK EXPERIENCE:

Foundry Coordinator at Rastgar Engineering Company - Calculate least cost charge composition for various grades/qualities of metal. - Provide charge calculations for furnace raw material . - Monitor daily sand testing reports, cross-check results and implement corrective actions as needed. - Investigate issues related to KWC and HWS platforms, taking steps to rectify them. - Regularly review furnace charge sheets and ensure accurate documentation on Indago. - Validate gating system calculations for new development to ensure efficient gating system. - Contribute to the development of new systems and processes within the foundry. - Analyze defects arising from casting processes and proactively apply corrective measure to enhance product quality. - Analyze and interpret sand test graphs to evaluate the quality of foundry sand materials. - Manage technical files related to customers and industry standards. - Provide assistance to simulation engineers in delivering defect-free simulation reports to the product development department for pattern making. - Manage the practices and review of standard operating procedures(SOPs) for furnace operations. - Conduct inspections to identify primary and secondary rejections, while also maintaining a detailed rejection report. - Maintain casting Defects reports for each part, documenting and analyzing defects for continuous improvement. - Coordinate with production planning to ensure timely and efficient casting schedules. - Review daily furnace production sheets and subsequently send emails to relevant departments. - Manage and verify reports pertaining to all new raw materials used within the foundry.	01/2024 - Present
Assistant Manager - FARIS, Pakistan Ordnance Factories - In-depth understanding of carbon fiber composite materials, their properties, and fabrication techniques. - Proficient in analyzing and selecting appropriate carbon fiber materials for drone components based on structural requirements and weight optimization and skilled in handling carbon fiber layup, vacuum bagging, and curing processes. - Experience in designing and fabricating carbon fiber drone frames for enhanced durability, weight reduction, and aerodynamic performance. - Proficient in utilizing CAD software (SolidWorks) for 3D modeling and generating manufacturing drawings. - Skilled in conducting inspections, performing non-destructive testing (NDT), and analyzing data to identify and resolve manufacturing defects. - Skilled in utilizing statistical tools (Six Sigma) to analyze data and drive process optimization initiatives. - Implemented quality control procedures to ensure compliance with industry standards, resulting in a decrease in product defects by 60%.	05/2023 - 01/2024
Production Engineer - Bestway Cement Limited - Involved in designing and optimizing the cement manufacturing process. This includes analyzing and improving process parameters, such as raw material composition, fuel usage, and energy efficiency, to maximize production output and minimize costs. - In-depth technical knowledge of Kiln, Pre-heaters and Clinker Coolers	08/2022 - 05/2023
Production Internee - Atlas Honda - Assisted in setup and monitoring of machinery for low-pressure die casting process, ensuring consistent production of engine components. - Participated in mold preparation, casting, and post-casting tasks like trimming and quality checks for engine parts. - Collaborated with team to identify process inefficiencies, analyzed data, and proposed solutions for improved production efficiency.	06/2021 - 07/2021

SKILLS:

Cast Iron | Metal Casting, Production and Planning | VIP Induction Furnaces | HWS and KWC Casting Plant | Pattern Shop| Gating System Calculations | Spectroscopy | Casting Process | Resin Infusion Methods| Destructive and Non-destructive Testing| kiln, Pre Heaters, Coolers | Financial Management | Task Oriented | Heat Treatment | Strategic Advertisement | Public Dealing | Strategic thinking | Problem-Solving Abilities | Excellent Communication | Analytical and Decision-making Abilities | Welding Grinding and Polishing Process| AutoCad, SolidCast, Inspire Cast, Creo, SolidWorks, Blender| Carbon fiber fabrication|

PROJECTS:

- CASTING OF BREAK DRUMS, STEERING KNUCKLE FOR TOYOTA, HONDA AND VOLVO.
- FABRICATION OF 10 MILITARY DRONES
- MULTILAYERED COMPOSITE OF KEVLAR FOR BALLISTIC PROPERTIES
- FABRICATION OF STAIR CLIMBING ROBOT
- FABRICATION OF BULLET PROOF JACKET
- QUENCHING AND CARBURIZING OF ALUMINUM

LEADERSHIP ROLES/ ORGANIZATIONS:

- | | |
|--|-------------------|
| • ASSOCIATION OF COMPUTING MACHINERY (ACM) - PRESIDENT | 05/2021 - 06/2021 |
| • PROJECT TOPI - GENERAL SECRETARY | 05/2021 - 06/2021 |

PROJECTS:

CRICKET| GRAPHIC DESIGNING| SOCIAL WELFARE | SKETCHING| FREELANCING | TRAVELLING
