

HAMED ISMAIL ALHUSSAIN

Mechanical Engineer | Field Engineer

Eastern Province, Saudi Arabia | +966 508 106 799 | Hal7ussain@hotmail.com | www.linkedin.com/in/hamed-al-hussain-b8b380194

PROFESSIONAL SUMMARY

Mechanical Engineer with 2+ years of intensive field experience executing 100+ wellbore surveying operations across onshore and offshore environments. Proven hands-on leader in coordinating multidisciplinary teams of 5+, resolving critical technical failures under pressure, and delivering results ahead of schedule, with zero recordable safety incidents. Versatile engineering professional eager to drive operational excellence across construction, manufacturing, operations, and project-driven industries.

PROFESSIONAL EXPERIENCE

Field Engineer | Gyro Engineer

Scientific Drilling | Oil & Gas Industry | Mar 2024 – Mar 2026

- Executed 100+ onshore & offshore surveying operations maintaining a near-zero error rate in wellbore positioning data critical to real-time drilling decisions.
- Diagnosed and resolved a critical Gyro tool failure mid-operation, preventing significant non-productive time (NPT) and preserving full client confidence.
- Led multidisciplinary field teams of 5+ on active rig sites, aligning technical crews, drilling engineers, and client representatives to deliver targets ahead of schedule.
- Enforced HSE compliance across all field activities with zero recordable incidents, conducted daily risk assessments and safety briefings in high-risk onshore and offshore environments.
- Managed full equipment lifecycle (pre-job inspection, calibration, QA/QC, post-job maintenance) ensuring consistent tool readiness.
- Streamlined field reporting workflow, reducing post-operation documentation time and improving handover accuracy across multidisciplinary teams.

Maintenance Engineering Intern

SABIC / Hadeed | Jun 2022 – Aug 2022

- Supported preventive maintenance programs and equipment inspections, contributing to improved reliability and reduced unplanned downtime.
- Participated in root cause analysis (RCA) investigations, identifying failure modes and recommending corrective actions adopted by the maintenance team.

CERTIFICATIONS

- Tropical Basic Offshore Safety Induction and Emergency Training (T-BOSIET)
- H2S Safety Certification
- Rigging and Slings Certification

KEY SKILLS

Engineering & Technical: Mechanical Systems Troubleshooting & Fault Diagnosis | Equipment Calibration & QA/QC | Gyro Surveying – Memory, Wireline & MWD | Wellbore Positioning & Data Interpretation

Leadership & Operations: Field Operations Leadership | Cross-Functional Team Coordination (5+) | Project Planning & Execution | Stakeholder Communication | HSE & Risk Assessment

Software & Tools: AutoCAD | SolidWorks | MATLAB | Microsoft Office

EDUCATION

Bachelor of Science in Mechanical Engineering

Prince Mohammad Bin Fahd University, Dhahran, KSA | GPA: 3.69/4.0 (Excellent) | Third Honors List | Dean's List: 2019, 2021

Senior Project: Wells Turbine – Renewable Energy Conversion System (Recognized among Top Projects by Faculty)

LANGUAGES

Arabic: Native **English:** Excellent — Fluent in speaking, reading, and writing
