

Ahmed Hafiz Ahmed Ibrahim

Mechanical Engineer | EPC & Industrial Projects | PMP Certified | Piping & Pipeline Fundamentals

Saudi Arabia | +966538257323 | Engahmed.hafiz19@gmail.com | <https://linkedin.com/in/ahmedhafiz> -

PROFESSIONAL SUMMARY

PMP® Certified Mechanical Engineer with 3+ years of experience supporting EPC and MEP projects across commercial, governmental, and multidisciplinary construction environments. Skilled in project coordination, planning, scheduling, HVAC systems, chilled water piping, firefighting systems, and technical documentation.

Knowledgeable in piping systems, pipeline fundamentals, P&ID drawings, isometric drawings, valves, fittings, and EPC project workflows. Completed specialized training in piping engineering, pipeline fundamentals, and piping construction & inspection.

Proficient in Primavera P6, AutoCAD 2D/3D, Revit MEP, HAP, and Microsoft Project with a strong commitment to HSE compliance, quality standards, and continuous

professional development. Familiar with ASME, API, ASTM, ANSI, and Saudi Aramco Engineering Standards (SAES).

PROFESSIONAL EXPERIENCE

FINIOON CONTRACTING COMPANY | Riyadh, Saudi Arabia

Mechanical Projects Engineer | MEP& EPC Projects | Oct 2024 – Present

- Managed and supervised mechanical construction and EPC activities, including chilled water piping systems, firefighting piping systems, HVAC systems, plumbing systems, and multidisciplinary coordination works across commercial and governmental projects. Coordinated project activities with clients, consultants, subcontractors, suppliers, and site teams to ensure successful project delivery.
- Prepared and monitored project schedules, manpower allocation, procurement activities, and site progress.
- Performed technical coordination, shop drawing reviews, material submittals, and project documentation activities.
- Utilized Primavera P6, AutoCAD, HAP, Duct Sizer, and Microsoft Office for project planning, reporting, and engineering calculations.
- Performed chilled water piping and firefighting piping coordination and calculation support.
- Ensured compliance with project specifications, quality standards, safety regulations, and engineering codes.
- Successfully completed 14+ projects with a total value exceeding SAR 12 million within planned schedules and project cost.
- Supported engineering coordination and construction activities within multidisciplinary EPC project environments while ensuring compliance with HSE and quality standards.

GOLD STONE ENGINEERING | Khartoum, Sudan

Mechanical Design Engineer (MEP) | Oct 2022 – Aug 2024

- Designed HVAC systems according to local and international engineering standards.

- Performed cooling load calculations using HAP software and prepared technical reports.
- Designed plumbing systems, including water supply, drainage, and vent systems.
- Developed firefighting systems including wet pipe, dry pipe, pre-action, deluge, CO2, and FM200 systems.
- Prepared shop drawings and coordinated technical drawings using AutoCAD and Revit MEP.
- Supported project scheduling, quantity estimation, technical coordination, and project documentation.

SELECTED PROJECTS

Commercial and governmental construction projects involving HVAC systems, chilled-water piping, firefighting systems, plumbing systems, and multidisciplinary coordination.

- Building 17 Development Project – Saudi Defense Development Authority
- Alsaif Gallery Showroom Project – Al Nadwah District
- Nawa Investment & Real Estate Development Office Complex – Hittin District
- Al Nadwah Office Complex Project VRF System
- Aliyah Plus Residential Villas Project (15 Villas)
- Aliyah Residential Villas Project (10 Villas)
- Residential Villas Compound Project (10 Villas) – Beyond Construction Company

EDUCATION

Bachelor's Degree in Mechanical Engineering | Sudan International University | 2018 – 2023

CERTIFICATIONS

- PMP® Certification – PMI
- Saudi Council of Engineers (SCE)
- Primavera P6 Training
- Piping Engineering Training Program – 3 Months
- Pipeline Fundamentals – 60 Hours
- Diploma in Piping Construction & Inspection – 55 Hours
- OSHA Safety Certifications (24 Courses)
- IOSH Certification
- ISO 45001 Awareness
- Revit MEP | 40 Hours
- Plumbing Systems | 30 Hours
- Firefighting Systems | 30 Hours
- HVAC Systems | 30 Hours

TECHNICAL & PROJECT MANAGEMENT SKILLS

- EPC Projects
- Mechanical Engineering
- Project Coordination
- Project Planning & Scheduling
- Primavera P6
- Piping Systems Fundamentals
- Pipeline Fundamentals
- P&ID Drawings
- Isometric Drawings
- Construction Management
- HVAC Systems
- Chilled Water Piping
- Firefighting Systems
- Plumbing Systems
- Engineering Documentation
- Material Submittals
- Procurement Coordination
- Technical Coordination
- HSE Compliance
- QA/QC Awareness
- Industrial Projects
- Stakeholder Coordination

ENGINEERING SOFTWARE

- Primavera P6
- AutoCAD 2D & 3D
- Microsoft Project
- Microsoft Excel
- Revit MEP
- HAP
- Duct Sizer
- Microsoft Office

CODES & STANDARDS

- ASME B31.3 – Process Piping
- ASME B31.4 – Pipeline Transportation Systems
- ASME B31.8 – Gas Transmission & Distribution Piping Systems
- API Standards
- ASTM Standards
- ANSI Standards
- Saudi Building Code (SBC)
- Saudi Aramco Engineering Standards (SAES)

LANGUAGES

- Arabic
- English
