- Experience:
+15 Years in OIL & GAS
/ Pipeline Operation & Maintenance Manager

SKILLS SUMMARY

- pipeline operation and integrity: Pre-Commissioning and pipeline integrity.
- Logistics, Manpower & Equipment Planning.
- Project Management & Field Coordination.
- Maintenance & Asset Management.
- Reporting & Documentation.
- Process Optimization & Operational Efficiency

OTHERSKILLS

- Facilities Management.
- Prioritization and Organization skills.
- Organization and Management.
- The ability to analyze complex technical information.

CERTIFICATION

- Mechanical & Electrical Assembly Levels I & II By Rosen.
- Crane & Forklift. Firefighter.
- Safety Orientation (ARAMCO).
- Fire Safety Level II & H2S Safety.

ABDULRAHMAN ABUFARA

Operations leader of Middle East & Maintenance Manager

PERSONAL PROFILE

Committed and professional operations leader and maintenance manager with 15+ years of experience in mechanical engineering. Skilled in leading teams, solving complex problems, and delivering reliable results with a focus on doing the job right the first time. Passionate about innovation and turning ideas into practical solutions.

EDUCATIONAL HISTORY

Bachelor of Science in **Mechanical Engineering**. Applied Science University **Amman - Jordan**, Jan 2004 - Dec 2009

WORK EXPERIENCE

Operations Leader of Middle East

Transpipe Integrity Solutions | Jul 2020 - Jan 2026 - **Saudi Arabia**

- Managed field operations for ILI inspections, cleaning pigs, bending, and gauging activities across the Middle East.
- Coordinated teams, equipment, and cost estimates to ensure efficient project execution.
- Oversaw project budgets, logistics, manpower, and equipment for field operations.
- Ensured technicians were properly trained and equipped to perform tasks safely and efficiently.
- Monitored project scope changes, assessing cost and schedule impacts and reporting to clients and management.
- Supported pre-commissioning activities for pipeline projects.
- Implemented systems to track and control project costs and schedules across multiple projects.
- Prepared and submitted preliminary and final project reports.
- Maintained strong client relationships and ensured clear communication throughout project lifecycles.

Maintenance Manager

Aljabr Soft Drink | Jul 2018 - Mar 2020 - **Saudi Arabia**

- Planned and coordinated preventive maintenance projects to ensure equipment reliability.
- Prepared material takeoffs, specifications, and procurement while estimating manpower and project timelines.
- Analyzed project scope to develop and manage maintenance budgets.
- Tracked expenses and controlled maintenance costs to stay within budget.
- Planned and supervised repair and installation activities.
- Maintained accurate daily progress reports and maintenance logs.

Mechanical Assembly , Preparation & Reconditioning

ROSEN Group | Feb 2011 - Feb 2018 - **Saudi Arabia**

- Worked with ROSEN Group on pipeline inspection projects for ARAMCO and major oil & gas clients.
- Conducted field preparation and pipeline assessments, including welds, valves, and configurations.
- Operated and maintained mechanical and electronic in-line inspection (ILI) tools (Level I & II certified).
- Performed tool inspection, calibration, and reconditioning after pipeline runs.
- Utilized cleaning pigs and inspection tools (MFL, Caliper, Ultrasonic, EMAT and combined technologies) to detect corrosion, defects, and metal loss.
- Supported data collection and analysis for pipeline integrity assessments.

Maintenance Engineer

DELAVAL | Jul 2009 - Feb 2010 - **Jordan**

- Repaired and tested mechanical components in accordance with technical procedures, drawings, and specifications.
- Performed routine maintenance to ensure machinery operates at optimal performance and reliability.
- Diagnosed faults and implemented effective corrective actions to minimize downtime.
- Ensured compliance with safety and quality standards during all maintenance activities.
