

MUHAMMAD IRFAN

QC Engineer / Inspector
Contact: +966558073464
Email: Engr.irfan22@gmail.com
Current Location Jubail, Saudia
Saudi Engg. Council # 1001814
VISA Status: Transferable Visa

PROFILE

- 10+ Years experience as QA/QC Engineer / Inspector in manufacturing / fabrication, erection and maintenance of Pressure Vessel / Columns, Heat Exchangers, Fin fan Cooler, Boiler, Piping Skids and Process Piping for oil and gas, fertilizer and petro chemical plants.
- Certifications in **CSWIP 3.1, API 653, API 510, API 570, API 580 & ISO 9001:2015, NDT Level II (PT, MT, UT, RT)**.
- Familiar with ASME & ASTM, API 650, API 653 standards and API 653, API 510, CSWIP 3.1 certified.
- Familiar with Saudi Armaco (Engg. standards, material specification, typical inspection plan, Inspection Check list, engg. procedures. Schedule Q, Quality Plan and testing procedure)
- Planning to execute the project within time, budget and HSE requirements.

CAREER OBJECTIVE

Intend to build a career with progressive cooperate, aim to become a dependable team member utilizing my knowledge, skills, potentials, and expertise. An ambitious engineer with a strong academic background, excellent communication skills, and a good working understanding of the Mechanical procedures and activities. Right now, I am looking for an QA/QC engineer / Inspector position with a company like yours, that not only provides a stimulating and challenging environment, but also opportunities for career growth and promotion.

PROFESSIONAL CERTIFICATIONS

SR No	Certificate	Description	Certificate No
1	API 510	In service inspection, rating repair and alteration for Pressure Vessel	120554
2	API 653	In service inspection, rating repair and alteration for Oil Tanks	112159
3	API 570	In service inspection, rating repair and alteration for Piping	127766
4	API 580	Risk Based Inspection	124495
5	CSWIP 3.1	Certification Scheme for Welding Inspection Personnel	442373
6	ISO 9001:2015	Quality Management System	5288
7	NDT Level II	PT, MT, UT, RT	

ACADAMIC QUALIFICATION

Bachelors in Mechanical Engineering 2016 Bahauddin
Zakariya University, Multan, Pakistan
Saudi Engineering Council Verification No: 100814

PROFESSIONAL EXPERIENCE - 10 YEARS

- Working as QC Engineer in **OLAYAN DESCON Engineering / Industrial Company Saudi Arabia** from **DEC 2023 to Till Date**
- Worked as QC Engineer in **DESCON ENGINEERING** from **Nov 2019 to Nov 2023**
- Worked as QC Inspector in **AL WANEES Contracting Company UAE** from **Mar 2019 to Oct 2019**.
- Worked as QC Inspector in **DESCON ENGINEERING** from **Mar 2016 to Feb 2019**.

RESPONSIBILITIES IN PRESSURE VESSELS / COLUMNS / HEAT EXCHANGERS:

- Material receiving inspection and dimensional verification as per approved drawings.
- MTC's review of incoming material as per specifications.
- Lay out Inspection of plate dimensions prior to cutting.
- Inspection of plate edge preparation as per approved WPS.
- Checking of shell roundness and ovality during plate rolling process.
- Joint fit-up inspection and welding inspection of shell long and circumferential seam
- Preparation Daily Fit-up, Weld Visual Reports and Inspection Checklists.
- Check machining of tube sheets of Heat Exchangers as per approved drawings.
- Performed inspections of tube bundle skeleton of Heat Exchangers.
- Check final inspection of tube bundle and tube to tube sheet expansion.
- Final visual & dimensional inspection as per Code and standard.
- Controlling the Preheat & PWHT and reviewing the PWHT Charts and Hardness reports.
- Coordination with client and raising NCR's & RFI's.
- Controlling the NDT jobs as per Project specification and reviewing reports.
- Preparation of welder performance reports on Weekly basis.
- Checking and rectification of the punch list and taking approval and Release from the client for Hydro test.
- Preparation of Hydro test Package.
- Carrying out the Inspection of Hydro test.
- Carrying out the Alignment and Leveling Inspection of Structures & Equipment's.
- Inspection & Quality Control activities for pressure vessel, heat exchanger, piping & structural work.
- Witness for Thickness Measurement, Hardness Measurement, Hydro testing, Pneumatic testing, and Holiday Test, etc.
- Final documentation preparation & submission.

RESPONSIBILITIES IN WELDING:

- Witnessing Procedure Qualification Tests and Review PQR Record according to Code Requirements.
- Welder Qualification test for piping and in service welding as per ASME Sec IX and ASME B31.3.
- Monitoring the Welding activities as per WPS, PQR & Quality System Procedure.
- Witnessing Destructive & Non- Destructive testing for Procedure Qualification Tests.
- Witnessing Welder Performance Qualification Test as per ASME section IX.
- Checking Welding Consumables, Welder Qualification, Preheat and Inter-pass temperature and other Essential welding parameters as per WPS.
- Documentation and Control of Welding Consumable and Baking of Low Hydrogen Electrodes and Issue records.
- Responsible for monitoring all aspects of the welding process before, during and after welding to ensure that the finished weldments are fit for purpose.
- Monitoring NDE activities and attending repairs.
- Reviewing PWHT charts (heating and cooling rate, soaking temperature, and time) and Hardness reports.
- Verify daily welding production reports and ensure compliance with NDT requirements
- Familiar with welding processes such as SMAW, GTAW, SAW, GMAW and FCAW.
- Prepare inspection reports, weekly QA/QC reports and repairing status.

RESPONSIBILITIES IN PIPING / PIPING SKIDS:

- Inspection of all Incoming Material like pipes, flanges, fitting, valves, gaskets, flowmeters, pressure gauge, pumps and motors as per PR, PO, ASME codes, Standards and Client Specifications
- Review of Material Certificates
- Pipe joint fit-up and dimensional checking as per latest isometric drawing and relevant WPS.
- Preparing the Daily wise for Fit up Inspection Report & Weld Visual Inspection Report.
- Piping spools erection and checking for alignment, slope, and orientation.
- Coordination with Piping Foremen for daily fit-up reports.
- Erection Inspection of Spool pieces of pipelines and heavy structures based on isometric drawings.

- Walkthrough and QC Punch listing prior to hydro test.
- Witness Flushing and Cleaning of Piping system.
- Gasket verification, Bolt torque tightness witnessing, High point & Low point checking.
- Verification of Calibration certificates for Pressure Gauges, Manifold and Relief Valve etc.
- Preparation and review of Hydro Test Package and witness of Hydrostatic test.
- Performed F.A.T (Factory Acceptance Test) as per approved procedures and standards for skids.

RESPONSIBILITIES IN STRUCTURAL STEEL:

- Material receiving inspection and dimensional verification as per approved drawings.
- MTC's review of incoming material as per specifications.
- Performed the cutting, rolling, bending and machining inspections of materials as per approved drawings.
- Performed fit-up inspections as drawings and WPS.
- Performed during and final weld visual inspection as per WPS and AWS D1.1.
- Review RT or UT reports for all pressure / load containing / retaining joints as per approved ITP and drawings.
- Witness / review the PT or MT for other joints as per approved ITP and drawings.
- Performed final inspection as per approved as built drawings.

OVERALL RESPONSIBILITIES:

- Review of PQR, WPS and WQT
 - Controlling the flow of inspection as per ITP and generate NCR if required.
 - Identifying the non-conformances, addressing them in Non-conformance report (NCR) and resolving them with proper corrective & preventive actions. Maintaining the NCR logbook and follow-up to close NCR's.
 - Inspection of all Incoming Material as per PR, PO, ASME codes, Standards and Client Specifications.
 - Review of Material Certificates, Consumable Test Certificates, & Calibration Certificates of equipment's.
 - Witness of all mechanical testing for PQR & WQT for piping, tank, and pressure vessels.
 - Inspection of all Mechanical and Welding activities of Piping, Pressure Vessel, storage tank fabrication according to ASME B31.3, ASME Section VIII Div. 1 and ASME Section IX, API 650 & end user standards and specifications.
 - Execute the field welding inspection, surveillance, and Quality Control activities site, collecting the relevant objective evidence.
 - Witness of the Pressure Testing Like: Air leak testing, Hydro testing, and coordinate to Client for final inspections.
 - Monitoring and Advice to the workshop and jobsite related to welding, NDE, PWHT, Hardness Testing and Material control
 - Ensure that all welding operations are executed in accordance with all relevant codes of Practices and Company procedure/practices/ Quality Control Plan/Inspection Test Plan.
 - Traceability for structural vessel, piping welding repairs, electrodes and consumables and other welding processes as required.
 - Developing and implementation of work instructions for part fit-up, tack weld and repair requirements.
- QA/QC Inspector worked in Fabrication shops covering material inspection and various stages of fabrication inspection of fabricated items.
- Preparation of inspection reports, maintaining records of inspections, and continuously informing others on Inspection results.
 - Arrange/Provide orientation to the mechanical crafts (Welders and fabricators) for pipe fitting and welding standards, codes etc. to have a close awareness among the welding system requirements.
 - Weekly preparation and submission of QC Report to the QC Manager.
 - All job activities proceed with full safety attention to prevent any job interruptions.
 - Check the calibration of instruments and monitor the next calibration schedule.
 - Review the final QC Dossier/Inspection Records and hand it over to clients and company.

MILE STONES PROJECTS:

❖ Currently working as QC Engineer in OLAYAN DESCON Engineering / Industrial Company Saudi Arabia.

- CLIENT: PATROKEMIA (SABIC).
 - Manufacturing of 10 No's of Pressure Vessels
 - Manufacturing of 06 No's of Above Storage Tanks
 - Valve Testing and Receiving Inspection of PSV's / PRV's & Gate Valves
- CLIENT: ARAMCO.
 - Manufacturing 02 No's of Pressure Vessels
 - Manufacturing 02 No's of Heat Exchangers

❖ Worked As QC Inspector in DESCON Engineering Ltd. Pakistan

- CLIENT: MOL PAKISTAN LTD. - 02 No's of Slug Catchers (ASME B31.8)
- CLIENT: PAKISTAN OIL FIELD LTD. - 02 No's of 50 TON LPG BULLETS, U Stamped
- CLINET: NESTLE - Piping Skids (ASME B 31.1)
- PAKISTAN PETROLEUM LIMITED - Pre-Heater, U stamped.
- CLIENT: ARL PAKISTAN & HYUNDAI - Vertical Vessel U stamped
- CLIENT: KAPCO - 13 No's of Heat Exchangers, U stamped
- CLINET: MOL PAKISTAN - Fuel Gas Knock Out Drum, U stamped.
- CLINET: ENGRO FERTILIZER - Furnace Replacement.
- CLINET: PAK ARAB FERTILIZER - Furnace Replacement.
- CLINET: NATIONAL REFINERY - Replacement of Roof and bottom plates of Storage Tanks.

SOFTWARE SKILLS

- MS Excel
- MS Word
- MS Power Point

Other Skills

- Have Complete understanding of QA / QC standards.
- Having leadership quality.
- Ability to tackle critical situation.
- Having a flexible attitude & positive approach.
- Executes the projects according to the procedures.
- ability to plan and organize work flow in efficient manner.
- Good team, management and communication skills

ROFESSIONAL MEMBERSHIPS:

- P.E.C (Pakistan Engineering Council)
- SAUDI ENGINEERING COUNCIL
- ASME (American Society of Mechanical Engineering)

PERSONAL INFORMATION

Name: Muhammad Irfan
Father Name: Muhammad Qaisar Zaman
Contact: +966558073464, 00923027607274
