

Umer Farooq

Nationality: Pakistani **Date of birth:** 14/03/2001 **Gender:** Male

Phone number: (+92) 3337040547

Email address: engumerfarooq99@gmail.com

Home: Abdullah Pur Colony Street No 3 Gojra District Toba Tek Singh, 36120 Gojra (Pakistan)

ABOUT ME

I was among the top 10 students in my class. Energetic individual with outstanding interpersonal, analytical, and critical thinking skills. Responsible and motivated student ready to apply education in the workplace. Offers excellent technical abilities with software and applications, ability to handle challenging work, and excellent time management skills

WORK EXPERIENCE

Internship

Qadcast Pvt Limited [01/06/2022 – 30/06/2022]

City: Lahore | **Country:** Pakistan

Key Responsibilities/ achievements

- Developed exceptional management and interpersonal skills through hands-on experience in the casting industry.
- Acquired proficiency in various casting techniques, including pattern and mold making, contributing to a comprehensive understanding of the production process.
- Successfully completed two projects on production management within specified deadlines, collaborating effectively with team members to achieve objectives.
- Demonstrated adaptability and problem-solving abilities when encountering challenges during casting processes, contributing to efficient problem resolution and project success.
- Gained practical experience in quality control measures, ensuring products to industry standards and customer requirements.

Engineer

Mughal steel [01/08/2023 – Current]

City: Lahore | **Country:** Pakistan

Key Responsibilities/ achievements

- Process control at the induction furnace
- Managing scrap blend.
- Managing the chemistry of molten steel to get a required grade (Grade 40,60 or special grade).
- Controlling the composition and melting process of molten steel by using steel making and thermodynamics Knowledge.
- Minimizing delays to prepare heat on time with required temperature of molten steel to run the sequence at the continuous casting machine (CCM)
- Optimize units to reduce electricity consumption and control costs.
- Oversee the lining of the furnace to prevent furnace leakage and control lining consumption.
- Report and coordinate with the team to run the sequence and process smoothly.

Engineer

Mughal steel [01/08/2023 – Current]

City: Lahore | **Country:** Pakistan

Key Responsibilities/ achievements

- Managing process, production, documentation, and quality assurance at the non-ferrous recycling plant.
- Team management by making the duty rosters of the team and assigning them respective duties to control the process.
- Maintaining the process flow and minimizing delays using 6s methodology.
- Minimizing delays by making Total Preventive Maintenance plans
- Overseeing machine performance and conducting autonomous maintenance when required
- Maximizing production and yield through continuous process development while maintaining the quality of the products.

EDUCATION AND TRAINING

Bachelors of Metallurgical and Materials Engineering

University of Engineering and Technology Lahore

City: Lahore | **Country:** Pakistan | **Final grade:** 3.38/4

Intermediate

The Prime Standard Group of Colleges Gojra

Country: Pakistan | **Final grade:** A

Matric

The Shiblee Boys High School Gojra

Country: Pakistan | **Final grade:** A

LANGUAGE SKILLS

Mother tongue(s): Urdu

Other language(s):

English

LISTENING C1 **READING** B2 **WRITING** B2 **Speaking** B2

DIGITAL SKILLS

Microsoft Office / Google Docs / Abacus software / Solidworks / Python (in progress)

NETWORKS AND MEMBERSHIPS

SOMAME (Society of Metallurgical and Materials Engineering)

- Collaborated with the finance team to manage and oversee financial activities for various events and ceremonies.
- Ensured accurate budgeting, expense tracking, and financial reporting during all society functions.
- Assisted in financial decision-making to optimize resources and control costs.

PROJECTS

Properties analysis of PLA reinforced jute/flax by simulation

Conducted a comprehensive properties analysis of PLA (Polylactic Acid) reinforced with jute and flax through simulation. Aimed to assess the mechanical, structural, and performance enhancements of the composite material, contributing to advancements in sustainable and eco-friendly material development.

TECHNICAL SKILLS

- Metallography
- NDT and destructive testing
- Electric arc welding
