OBJECTIVES

Confident person, who thinks strategically, communicates well and works as part of a team, even under pressure. Want to achieve a challenging career in the field of “ELECTRICAL ENGINEERING” and join a multicultural organization with people from all over the world as a key team player with a view to encouraging teamwork and cross-fertilization of knowledge and experience.

WORK EXPERIENCE

Inspection Engineer:

Nov 2024 to Present

YASTRONICS Electronics Component Co.

- Conducted detailed inspections of machinery, equipment, and structures to verify compliance with safety standards and regulations.
- Prepared comprehensive inspection reports, including findings and recommendations for corrective actions.
- Collaborated with engineers and project managers to ensure that work meets safety, quality, and environmental regulations.
- Identified structural defects in equipment that led to a 30% reduction in maintenance costs after implementing corrective measures.
- Played a key role in securing ISO/IEC 17020:2012 accreditation by ensuring compliance with inspection standards.

Electrical Engineer:

Feb 2022 to Aug 2024

Inspection Engineer at Pakistan Oil Fields Rehabilitation Project Singh and Punjab

- Ensure that the electrical systems are designed, installed, and tested in compliance with safety standards, electrical codes, and project specifications.
- Oversees the construction to ensure adherence to approved drawings and specifications; inspects construction workmanship, materials, equipment.
- Ensures that delivered material (Cables, Conduits, Cable trays, panels, disconnect switches, transformers etc.) are as per approved PO and are in compliance with applicable standards and project specification.
- Responsible for work progress and site issues, managing resources to expedite the job and complete target with in time limits.
- Manage site work and resolve all quality and work-related issues on time.
- Plan and allocate the labor, tools and equipment as required.
- Plan, Supervise and Monitor various construction activities like Installation of all type of conduits, (PVC, EMT, RGS, LTFC), Installation of distribution panels SMDB's, DB's & Switch

- Reporting of site activities on daily base to Construction Manage.
- conduits, (PVC, EMT, RGS, LTFC), Installation of distribution panels SMDB's, DB's & Switch Board's.
- Monitor and supervising Cable installation Testing & Termination.
- Prepare Tracking sheets of Materials, Construction Activities for my area of responsibility.
- Assisting the quality inspector during inspection by providing them proper tools.
- Reviewing all quality related activities & preparing all quality related reports on site.
- Reporting of site activities on daily base to Construction Manage.

NATIONAL ENGINEERING (NE):

DEC 2015 to Aug 2022

JOIN AS INSPECTOR TRANSMISSION ENGINEER ON MPLS-TP (FIBER HOME)

- Conduct on-site inspections of telecom towers, antennas, fiber optic cables, and other network infrastructure.
- Verify compliance with technical specifications, industry standards (e.g., ISO, ITU, ANSI), and regulatory requirements.
- Check the quality of materials, installation practices, and structural integrity of telecom equipment.
- Ensure adherence to health, safety, and environmental (HSE) regulations.
- Verify compliance with local and international telecom regulations
- Inspect grounding, lightning protection, and electrical safety measures.
- Prepare detailed inspection reports with findings, non-compliance issues, and corrective actions.
- Maintain records of inspections, test results, and certifications.
- Report defects, deviations, or risks to project managers and stakeholders.
- Conduct signal strength tests, fiber optic continuity tests, and RF (Radio Frequency) measurements.
- Validate network performance parameters like latency, bandwidth, and signal interference.
- Inspect BTS (Base Transceiver Station), microwave links, and DAS (Distributed Antenna Systems).
- Monitor subcontractors and vendors to ensure work meets contractual and technical standards.
- Review as-built drawings and compare them with actual installations.

QUALIFICATION

- **Bachelor of Electrical Engineering**
2010 – 2014– Sarhad University of Sciences & IT, Peshawar.
- **HSSC Pre Engineering**
2007– 2009 – Govt College Peshawar
- **SCC- Science Group**
2006 – 2007 – Golden Gate Public School

Technical Skills

- TEMS INVESTIGATION 8, 10,12,13, 14, 15, & 16
- MAPINFO for professional
- Nemo Outdoor
- Probe
- VFL and LIGHT SOURCE for optical pair allocation.
- OPTICAL POWER METER.

Telecommunication

- CCNA Routing and Switching (certified) CSC013513223
- HCIA Routing and Switching (certified) Reg no: 367126439
- CCNP ENCORE (Certified) CSC013513223
- CCNP ENARSI (Certified) CSC013513223
- MSCE

Safety Courses:

- NEBOSH 2022
- IOSH 2023
- OSHA 2023
- RISK ASSESMENT
- FIRE SAFETY
- FIRST AID Certified

Lifting Equipment Engineering Association (LEEA)

- Foundation Course FOU Clear
- Lifting Accessories Diploma (GLOBAL) LAC

LANGUAGE

Well versed in English, Urdu, and Pashto.
