

NAEEM ULLAH KHAN

CSWIP 3.1 Certified Welding Inspector

+966-575953224 | jatoinaeem31@gmail.com | Dammam – Saudi Arabia

Career Objective:

Highly skilled and CSWIP 3.1 certified Welding Inspector with overall 13 years of experience in QA/QC, inspection, and integrity management. Expert in ensuring compliance with international codes (ASME, API, AWS, ISO, Aramco) during fabrication, installation, and maintenance projects. Proven ability to minimize rework and downtime through rigorous visual inspection, documentation review, and effective communication with project management and welding crews. Committed to maintaining the highest safety and quality standards on site.

Core Competencies:

- Certification: CSWIP 3.1 (Welding Inspector)
- Code Expertise: ASME B31.3 (Process Piping), ASME IX (Welding Qualifications), API 1104 (Pipeline Welding), AWS D1.1 (Structural).
- NDT Interpretation: Expertise in reading and interpreting RT (Radiography Testing) films, MT (Magnetic Particle), and PT (Dye Penetrant) results.
- QA/QC Documentation: Reviewing ITPs (Inspection and Test Plans), WPS (Welding Procedure Specifications), PQR, and WQT (Welder Qualification Tests).
- Defect Detection: Advanced visual inspection for surface discontinuities, porosity, slag inclusions, and lack of fusion.

Academic & Technical Qualification:

- 4 Year Bachelor of Technology in Mechanical from The University of Lahore 2011

Employer: **OLAYAN DESCON KSA**
Project: YASREF Shutdown
From: 28-01-2025 to 19-04-2025
Position: **QC WELDING INSPECTOR**

Project: RASTANURA Refinery Shutdown
From: 07-09-2024 to 20-12-2024
Position: **QC WELDING INSPECTOR**

Project: Yambu Refinery Shutdown
From: 24-01-2024 to 16-04-2024
Position: **QC WELDING INSPECTOR**

Project: SAMREF Shutdown
From: 21-09-2023 to 22-01-2024
Position: **QC WELDING INSPECTOR**

Responsibilities:

- Monitoring of inspection activities at site with client coordination on piping & static equipment like Heat Exchangers, Columns, Pressure Vessels, Storage Tanks, Reactor, Furnace/Heaters & Fin Fans.
- Understanding scope of work from contracts and technical specifications of projects.
- Managed Quality Control and Assurance for various oil and gas projects and turnaround maintenance activities, ensuring compliance with industry regulation.
- Ensure compliance with the Project Quality Plan and contract specifications. Witness and record welder performance qualifications, ensuring all welders are certified for their specific processes and materials.
- Monitor welding parameters (amperage, voltage, travel speed, interpass temperature) to ensure alignment with

approved WPS.

6. Facilitate pre-weld briefings to clarify project expectations and mitigate common weld failures.
7. Verified that all welding consumables were stored, handled, and baked in accordance with manufacturer recommendations and EN 1011.
8. Managed the Weld Log and ensured 100% traceability of materials and welder identification.
9. Review of project quality management documents, ITP, WPS and Inspection Checklists.
10. Material Receiving inspection as per project specifications & drawings, visual and dimension inspection of incoming material.
11. Verification of MTCs and material traceability in compliance with project specifications and codes/standards.
12. Ensure that all inspection and tests are carried out as per approved ITP, Method Statements, Procedures and drawings regarding Piping related activities.
13. Ensuring Proper Fabrication (Marking, cutting, fit-up) and dimensional inspection of piping.
14. Installation of Piping components and Steel Structure, Pipe Support, Valves used in Piping as per approved Isometric drawings.
15. Checking calibration certificates of Pressure Gauges, PSV's and manifold assembly.
16. Review of piping test packages and witness of hydro testing with client.
17. Witness of internal cleaning after hydro testing and correct gasket installation.
18. Bolt torquing inspection and Flange Integrity Verification.
19. Identified and resolved quality issues through root cause analysis and corrective actions for any non-conformance.
20. Submitting complete Mechanical Dossiers and closing Punch list, maintaining all documents records of Mechanical activities

Employer: **SINOMA HANDAN INTERNATIONAL**
Project: Fauji Cement Company Ltd. (FCCL) DG Khan
From: 20-3-2023 to 15-09-2023
Position: **WELDING INSPECTOR**

Project: Askari Cement Company Ltd. (ACL) Line 3 Nizampur Nowshera KPK
From: 05-10-2021 to 15-3-2023
Position: **WELDING INSPECTOR**

Project: Kohat Cement Company Ltd. (KCCL) Line 4 Project
From: 28-03-2019 to 10-6-2020
Position: **WELDING INSPECTOR**

Responsibilities:

1. Perform daily visual inspections of fit-up, root pass, hot pass, and final cap welds for critical high-pressure pipelines, large Ducts and structure.
2. Ensure compliance with the Project Quality Plan and contract specifications. Witness and record welder performance qualifications, ensuring all welders are certified for their specific processes and materials.
3. Monitor welding parameters (amperage, voltage, travel speed, interpass temperature) to ensure alignment with approved WPS.
4. Facilitate pre-weld briefings to clarify project expectations and mitigate common weld failures.
5. Verified that all welding consumables were stored, handled, and baked in accordance with manufacturer recommendations and EN 1011.
6. Managed the Weld Log and ensured 100% traceability of materials and welder identification.
7. Issued and cleared NCRs, performing root cause analysis to prevent defect recurrence.
8. Collaborated with clients and third-party inspectors (TPI) during final sign-off phases.
9. Assisted in the hydrostatic testing and pneumatic testing of pipeline.
10. Conducted dimensional checks on structural steel components to ensure alignment with fabrication drawings.
11. Maintained traceability of materials, ensuring Mill Test Reports (MTRs) matched the heat numbers on all pipes and plates.
12. Managed the filing and digital archival of all inspection reports, ensuring 100% readiness for client audits.

Employer: **DESCON Engineering Abu Dhabi. UAE**
Project: ADNOC Gas Processing Plant (GASCO)
From: 15-09-2017 to 26-03-2019
Position: **PTW Coordinator / SUPERVISOR MECHANICAL**

Responsibilities: 1. Maintenance and commissioning of vessels, exchangers, flares and & Handle to Manpower.
2. Maintenance, commissioning of vessels, exchangers, Fabrication of cooling water lines
3. Replacement of small-bore piping (Below 2") and IWS job for processing lines & cement lines up to 60" dia and remove and re-install the KV valves, Hydro Testing for piping, Heat exchangers, maintenance of vessels and heat exchangers.
4. Replacement of small-bore piping (Below 2") and IWS job for processing lines

Employer: **DESCON Engineering LLC. Qatar**

Project: Qatar Chemical shutdown.

From: 14-12-2016 to 15-03- 2017

Position: **Lead worker Mechanical**

Responsibilities: Remove and re-install the KV valves

Employer: **ABDULLAH AL BARRAK Industrial Services (ABIS) KSA**

Project: Petro Rabigh Oil Refinery shutdown and Ma,aadan Phosphate Plant shutdown

From: 16-09-2015 to 02-02-2016

Position: **Work Permit Receiver**

Responsibilities: 1. Storage Tanks repairing
2. Maintenance of vessels, columns, tanks, IWS job for processing lines

Employer: **DESCON Engineering Abu Dhabi. UAE**

Project: Abu Dhabi Oil Refinery shutdown. (TAKREER)

From: 18-08-2014 to 15-11-2014

Position: **PTW Coordinator**

Responsibilities: Remove and re-install the KV valves.

Employer: **DESCON Engineering LLC. Qatar**

Project: Qatar Gas shutdown.

From: 10-01-2014 to 30-03- 2014

Position: **Leadsman**

Responsibilities: Maintenance of vessels, columns.

Employer: **DESCON Engineering Pvt. Ltd - Pakistan**

Project: UCH ii Power Plant Dera Murad Jamali Baluchistan

From: 05-01-2013 to 28-09-2013

Position: **Trainee Supervisor**

Responsibilities: 1 To assist Installation of Pipe ½" to 48" dia
2. Arrange & Assist Inspection of Joint Pipe Fit-up by QC Inspector
3. To assist Visual Inspection of Pipe welding ½" to 48" dia by QC Inspector
4. Preparation Final Report of VT and send to Main Office
5. To assist QC Inspector in Inspection of NDT (Non-Destructive Test) (RT, DPT,VT).
6. To check all Joints and Supports as per drawing in Package.
7. To Find the Modification in Drawing as Site requirement.
