Company:	NEOM ETSD Q&E Quality Inspector Mechanical
Position:	Nov 2022 – to cont...
Duration:	
Project:	GCS Company Government Security Complex
Company:	Saffaniyah +5Dispatch
Position:	Plumbing & HVAC QC Inspector
Duration:	Nov 2021 – Oct 2022
Project:	InoChem Soda Ash and Calcium Chloride Project
Company:	(ISACC) CHENGDA Company
Position:	Mechanical (Plumbing & HVAC) QC Inspector
Duration:	Dec 2019 – Oct 2021
Project:	Saudi Pharmaceutical Industries & Medical Warehousing & Office
Company:	Building Sahara Construction Contracting Est.
Position:	Mechanical QC Inspector
Duration:	Jan 2017 - Oct 2019
Project:	Shifa International Hospital Building
Company:	MEP Solution
Position:	Mechanical QC Inspector
Duration:	Aug 2014 - Nov 2016

COMPETENCIES / SKILLS

I. Quality Management II. Team Management III. Documentation IV. Auditing V. Reporting VI. Design Review

Task and Responsibilities

- Inspection of steel structure.
- Inspection of pre-fabricated Pota cabin (HVAC & firefighting work).
- Review of contractor ITP.
- Making daily quality observation Report.
- Contractor Material receiving inspection.
- Attended daily quality meeting to minimize issues of contractor.
- Installation Inspection of GRP water tank assembly.
- Installation and testing of pump room .
- Trench, layout & Installation Inspection of Thermoplastic pipes & fitting (PVC, CPVC, UPVC, etc.)
- Layout and Installation Inspection of RTR pipes (GRP, GRE GRV)
- Layout and Installation Inspection HDPE (butt Fusion & Electrocuting Joint)
- Manholes installation Inspection
- Inspection of final assembly of pipes
- Witnessing of hydro testing.
- Witness of Gravity Leak Test
- Material receiving, Storage and preservation inspection of Plumbing/firefighting
- Inspection of orientation, Installation of all HVAC equipment.
- Inspection of ducts and accessories installed prior to insulation and rapping.
- Ensure proper supporting and elevation of ducts installed.
- Inspection of duct insulation and wrapping.
- Fit up inspection of chilled water piping and condenser water piping.
- Monitor and inspect erection of fire water pipeline across the pipeline corridor
- Material receiving, Storage and preservation inspection of HVAC Units.
- Conduct inspection of received materials of duct and accessories and all HVAC Equipment
- Monitoring/Surveillance inspection for storage, stacking and handling of fittings And consumables including verification of temperature conditions
- Storage and preservation of HVAC units
- Inspection of ducts and accessories installed prior to insulation and rapping.
- Ensure proper supporting and elevation of ducts installed.
- Inspection of duct insulation and wrapping.
- Fit up inspection of chilled water piping and condenser water piping.
- Monitor and inspect erection of fire water pipeline across the pipeline corridor
- Conduct quality related meetings with client, vendors and contractors to ensure That quality is maintained on site.
- Co-ordinate with construction and QC department for ongoing site activities
- Identifying the material as per the standard drawings and specification.
- Witnessing & inspection of the installation of AHU, ACC, etc.
- Monitoring/Surveillance inspection for storage, stacking and handling of fittings And consumables including verification of temperature conditions.
- Inspection for packaging/loading for transportation to site for installation.
- Reviewing and Closing NCR of materials prior to assembly for scratches,

- Damages, cracks, delamination, crushing, weathering.
- Release of Structure to concern department after inspection.
Review Drawing and coordinate with discipline engineer.
- Monitor the contractor Inspector program and quality program are according To the drawing as built.
- Preparation and submittals of inspection notification for equipment and steel Structure to client.
- Preparation of work method statement and submittals to client.
- Identifying, analyzing and solving problems.
- Handling reports and related Data's.
- Knowledge of Principle and Practices in the related discipline.
- Implementing the QA/QC activities within the project.
- Inspection of raw materials.
- Providing timely progress feedback to the Quality Manager.
- Handling in Progress inspection of Structural & Fabrication Shop Including Material Traceability.
- Incoming Material Inspection Verified with MTC.
- Receive all the incoming documents/drawings from clients/Departments Within Company and update the tracking register of documents to monitor Current status.
- Coordination, meeting's with Clients Representative
- Punch list and Walk Down
- Ensure accurate reporting of all quality control activities within company project Organization.
- Follow site safety rules, practices and assist site team in promoting a culture of Safety on the site
- Assist the Project Head of Quality in the preparation of final dossier for hand Over to the client' operations group.
- Attend project quality meetings as required.
- Monitor daily activities and verify compliance to customer's specifications
- Conduct and ensure activities are completed in accordance with ITP
- Prepare daily QC records and final acceptance documentation as required
- Reject work that does not comply with or which was not inspected, tested or Examined in full compliance with the requirements of the drawing
- As a QC Inspector, responsible on monitoring and inspection of motor and pum

EDUCATION AND TRAINING

BACHELOR OF SCIENCE IN MECHANICAL ENGINEERING

University of Engineering and technology Lahore . [2010 - 2014]

Address: Lahore Punjab, (Pakistan)
