

SALMAN RAFIQ

Experienced Quality Control (QC) Chemist with rich experience in laboratory testing and quality assurance support within regulated manufacturing environments. Skilled in testing and release support for raw materials, in-process, finished product, and stability samples, with strong adherence to SOPs, cGMP/ISO requirements, and data integrity standards. Recognized for accurate, timely reporting, effective support in deviations and OOS/OOT investigations, and driving continuous improvement with cross-functional teams. Strong analytical mindset, keen attention to details, and proven ability to perform under fast-paced, high-pressure conditions.

Address:
Al Khobar, Bandariyah
34424 Saudi Arabia

KSA Visa details:

TRANSFERABLE
VISA/IQAMA

Education:

M.Sc. Chemistry
1st division
University of Karachi

Skills:

- MS Office
- Microsoft Teams
- TeamViewer
- SAP S/4 HANA

Language:

- English
- Urdu

Familiar with Quality standards:

- ISO 9001
- ISO 14001
- ISO 17025
- HACCP
- GMP
- GLP

EXPERIENCES

ASSISTANT MANAGER QUALITY CONTROL (QC) **Feb 2019 - Nov 2025**
HINUCON (PVT.) LTD Karachi, Pakistan

- Coordinated documentation and analytical testing for raw materials, semi-finished, and finished products, including specifications, sampling plans, stability programs, and approved test methods.
- Supported batch production documentation and laboratory records for critical processes; assisted in deviation investigations and OOS/OOT reporting.
- Reviewed and evaluated analytical results prior to release; provided technical guidance to analysts and colleagues; ensured QC data compliance with SOPs and quality standards.
- Monitored, controlled, and updated chemical inventory to support safe laboratory operations and uninterrupted testing activities.
- Managed instrument calibration and verification schedules using in-house and third-party service providers to maintain compliance and minimize downtime.
- Maintained a safe, efficient, and audit-ready laboratory environment through strong adherence to EHS practices and quality systems.
- Updated finished product and raw material specifications in line with current pharmacopoeia and regulatory requirements.
- Created and revised BOMs and manufacturing recipes in SAP; managed change control activities; executed finished goods release, transfer postings, and related transactions.
- Supported sourcing, evaluation, and purchasing of new laboratory equipment, including vendor coordination and documentation.
- Contributed to product development activities, supporting the formulation and development of multiple nutraceutical products.

QUALITY CONTROL (QC) IN CHARGE **Sep 2017 - Jan 2019**
NEUTRA CURE Karachi, Pakistan

- Executed quality control activities, including bulk and raw material releases, calibrations, and maintenance of equipment.
- Facilitated purchasing of new equipment and preparation of standard operating procedures.
- Conducted revisions of specifications to ensure compliance with industry standards.

ASSISTANT MANAGER QC **July 2015 - June 2017**
HERBION PAKISTAN (PVT.) LTD Karachi, Pakistan

- Facilitated quality control activities, including bulk and raw material releases, calibrations, and equipment maintenance.
- Assisted in preparation and revision of standard operating procedures and specifications.
- Supported new equipment purchasing processes.

SAP S/4 HANA SKILLS:	EXPERIENCES
- Inspection setup - MIC creation - Inspection plan creation & revision - Results recording - Usage decision - Recurring inspection - PR creation & revision - IR creation & revision - Calibration - MIGO - BOM creation & revision - Recipe creation & revision	ASSISTANT MANAGER RM & SAP POWER USER HILTON PHARMA (PVT) LTD Karachi, Pakistan Nov 2007 - July 2015 - Oversaw activities of raw materials section. - Ensured calibration of instruments used in chemical lab. - Standardized working standards via USP/BP/EP benchmarks. - Prepared test and volumetric solutions with standardization. - Planned daily raw material testing. - Developed SOPs and specifications. - Assisted in troubleshooting activities in raw materials section. - Utilized SAP as power user. - Supported QA officer in process and documentation tasks. - Participated as team member during SAP implementation phase. QUALITY CONTROL ANALYST ATCO LABORATORIES (PVT) LTD Karachi, Pakistan July 2006 - Oct 2007 - Conducted analysis of finished products. - Performed analysis of raw materials. - Prepared test solutions and volumetric solutions with standardization. - Assisted in process and documentation work as QC analyst. QUALITY CONTROL OFFICER EFROZE CHEMICAL INDUSTRIES (PVT.) LTD Karachi, Pakistan July 2005 - Mar 2006 - Conducted analysis of finished products. - Performed analysis of reverse osmosis water. - Executed analysis of raw materials, including RO, DI, and tap water. - Assisted in documentation and QA processes. - Participated in ISO 17025 accreditation efforts for laboratory. ANALYTICAL CHEMIST QUALITEST LABORATORY SERVICES (PVT.) LTD Karachi, Pakistan Nov 2003 - June 2005 - Executed third-party analytical testing for a broad portfolio of commodities, ensuring full compliance with GLP requirements and delivering accurate, consistent, and defensible results. - Performed laboratory analysis across multiple industries within an independent testing environment, including: - Edible oils and ghee. - Petroleum products (Crude oil, Gasoline, and Naphtha—supporting National Refinery Limited as a third-party analyst). - Food and Beverages (Milk, Water, Flour, Confectionaries). - Sugar, Molasses, Tea, Chewing gum. - Coal & Coke. - Industrial water testing for textile, construction, agriculture, and environmental applications (COD, BOD, TDS, Dissolved oxygen). - Drinking and RO water testing. - Conducted testing for a wide range of Chemicals, Raw materials and products, including Cement, Mining materials (Chrome, Iron, Copper, Manganese), Fertilizers, Ceramics, Construction materials, Dairy products, Soaps and Detergents, Acids & Bases, Soil/Clay/Sand/Fire bricks, Glass, Leather, Animal Feed and Metals (Iron, Steel, Lead, Nickel, Cobalt, Chromium, Manganese), as well as Boiler deposits, Seeds, and Chiller chemicals. - Demonstrated strong capability in parametric and specification-based analysis, interpreting results against applicable standards and reporting findings with clear technical documentation.
INSTRUMENTATION SKILLS:	
- HPLC - FTIR - UV/Visible Spectrophotometer - Karl Fischer - TOC Analyzer - GC - Viscometer - Refractometer - Polarimeter - pH Meter - Conductometer - Dissolution apparatus - DT apparatus - Friabilator - Melting point apparatus - Water activity meter - Potentiometer - Bulk density apparatus - Sieve shaker
