APPLYING FOR THE POST OF QAQC CIVIL/COATING INSPECTOR NACE/AMPP- LEVEL2 CERTIFIED

Summary

Highly motivated and detail-oriented QA- QC Civil & Coating Inspector with overall 11 years of experience in ensuring the quality and integrity of coatings in various industrial projects. Seeking to contribute my expertise in surface preparation, inspection techniques, and quality control procedures to a dynamic team. Dedicated to ensuring compliance with industry standards and customer specifications to deliver top-quality results. Committed to maintaining safety standards while enhancing the performance and durability of coating applications.

Education

- Bachelor of Engineering in *Civil Engineering (2015)*
Saudi Council of Engineers: Membership ID: 1122271
- AMPP Certified Coating Inspector, Cert No: 110222
- ISO 9001:2015 Lead Auditor (CQI&IRCA), Cert No: 532342
- SAP NO# 80046380, with CBT Pass.

Experience

SAPID QA/QC Inspector – Coating (Saudi Aramco Approved)

DNV | Saudi Arabia | May 2025 – Present

Project: Offshore Marjan Gas Lift Project – Package 1, Phase 1 & 2

Responsibilities involved inspection and oversight of coating activities associated with the installation of offshore jackets, decks, pipelines, spools, risers, and clamps. Ensured all works were executed in compliance with Saudi Aramco specifications and project quality requirements.

QAQC Inspector - Civil & Coating (NEOM ETSD)

Bureau Veritas | Saudi Arabia | Mar 2022 – May 2025

Project Involved: Trojena, Sindalah, Regional Infrastructure, Oxagon.

Regional Infrastructure – Production of precast concrete culverts at the world's largest precast factory (NEOM Precast Factory) for the installation of 80-inch diameter carbon steel pipes.

Oxagon Pipeline Project – Installation of 80-inch diameter carbon steel pipes with 3LPE external coating and liquid epoxy internal coating (over 200 KM), including the world's largest pumping station.

QC Inspector -Coating & Civil

Faiz Yousuf Zaid Gen. Contr. Est | Saudi Arabia | Jan 2020 – Dec 2021

Project Involved: Inspector in various projects involving coating industrial Support Facility Buildings, Painting and pipeline coatings.

QC Inspector -Civil (Saudi Aramco)

A.S Alsayed & Partners Contr. Co. LTD | Saudi Arabia | Mar 2018 - Aug 2019

Project Involved: EDRC- Community Support Facilities (Saudi Aramco)

QC Inspector -Civil (Aramco)

Etwall Technology & Trading |Saudi Arabia | Jan 2017 - Feb 2018

Project Involved: KACWC- King Abdulaziz Center for World Culture (Saudi Aramco)

Site Supervisor (CIVIL)

Reliable Corporation Pvt. LTD | April 2015 - Oct 2016

Project Involved: Site construction G+2

Job Responsibilities

- Reviewed IFC drawings, scope of work, and work procedures (method statements) to confirm compliance with project specifications and standards.
- Review and approve ITPs, method statements, material submittals, RFIs/WIRs, and ensure contractor adherence to project requirements.
- Monitor execution of work according to approved Inspection and Test Plans (ITPs) and project specifications, ensuring compliance with international codes and standards.
- Possess in-depth knowledge of international coating standards and industry regulations (ISO, NACE, SSPC, ASTM) and related QA/QC principles.
- Ensure all activities comply with SAUDI ARAMCO/NEOM specifications and project requirements.
- Led inspection and quality oversight of onshore pipeline installation projects, ensuring compliance with Aramco SAES, SATIP, and SAIC standards.
- Reviewed and validated installation analyses, method statements, and QA/QC documentation for pipeline and piping projects.
- Coordinated with EPC contractors and project engineers to ensure corrosion control compliance during design, construction, and commissioning.
- Inspect civil works such as earthworks, formwork, reinforcement steel, concrete, asphalt, and batching plant calibration.
- Witness and verify concrete testing (slump, air content, temperature, unit weight, compressive strength) and review third-party laboratory reports.
- Attended inspections and testing with contractor QC teams to verify proper implementation per IFC drawings, ITP, specifications, and schedule “Q” requirements.
- Ensured use of correct and approved materials in conformance with project requirements and standards.
- Inspect surface preparation for painting, coating, fireproofing, and insulation (hot and cold) ensuring compliance with ASTM, ISO, NACE, SSPC, and Aramco APCS specifications.
- Perform in-process and final inspections of coatings on pipelines, tanks, structures, and equipment before delivery or installation.
- Verify applicator certifications, inspect and ensure calibration of blasting/painting equipment and instruments.
- Monitor environmental conditions (temperature, dew point, relative humidity) before and during coating application.
- Witness and record Wet Film Thickness and Dry Film Thickness to meet specified standards.
- Carry out inspection techniques including surface cleanliness/profile checks, chloride tests, adhesion tests, and holiday detection.
- Inspect specialized coatings such as pipeline coatings (3LPE, FBE), heat shrink sleeve (HSS), and cementitious fireproofing.
- Assess coating appearance, color uniformity, and stenciling of identification markings on components.
- Ensure optimal application conditions during abrasive blasting and painting.
- Monitor and confirm compliance of accessories used in painting systems.
- Supervised pipeline welding, coating (FBE, liquid epoxy, (APCS-1A, APCS-1B, APCS-1C, APCS-1D, APCS- 2A, APCS-2C, APCS-11A, APCS11C, APCS-26, APCS 26T & APCS 113C)) hydrotesting, and reinstatement activities.
- Directed and mentored inspection teams, collaborating with civil, mechanical, coating, and HSE disciplines to resolve site challenges.
- Delivered projects within time and budget constraints, with a strong focus on safety, quality, and constructability.
- Corrosion and Integrity Management
- Conducted failure investigations and root cause analyses for pipeline/coating defects, recommending long-term corrective and preventive actions.
- Prepare technical quality reports, attend client/inspection meetings, and contribute to continual improvement initiatives.
- Prepare weekly quality reports, issue notifications for potential non-conformance, and initiate NCRs/SORs with root cause analysis.
- Maintain accurate documentation of as-built drawings, material approvals, and inspection records.
- Initiated proactive notifications and issued violation reports for any non-conforming activities.
- Attend client meetings to address NCR/Site Instructions closeout.
- Conduct surveillance to identify non-conforming work and verify corrective actions.
- Coordinate with contractors for snagging and de-snagging inspections, ensuring non-conforming work is rectified.
- Performed final PMCC-Exception Item List (EIL) inspections to ensure all remaining works were rectified prior to handover.
- Coordinated with EPC contractors and project engineers to ensure corrosion control compliance during design, construction.
- Directed and mentored inspection teams, collaborating with civil, mechanical, coating, and HSE disciplines to resolve site challenges.

- Technical reporting using EPM/QMS/Oracle Aconex for inspection-related reporting.

Training and Quality Awareness

- Organize training sessions, toolbox meetings, and workshops to improve site quality awareness.
-

AREA OF INTEREST

- Painting & Pipeline Coating Inspection, Passive fire protecting coating, Insulation Inspection, cementitious fireproofing coating FBE Coating

TECHNICAL SKILLS

- EPM, QMIS, ACONEX: Proficient in using for Quality Request (RFI) preparation, updating RFI status, and managing related processes.
- Microsoft Office Suite: Advanced skills in MS Word, MS Excel, and MS PowerPoint.
- Email Communication: Strong communication skills with clients via email, ensuring clarity and professionalism.
