

ZEESHAN ASIF

A committed fresh Metallurgy and Materials Engineering graduate with a strong interest in corrosion, heat treatment, and materials research. Passionate about contributing to innovative research and advancing knowledge in the field.

EXPERIENCE

AUGUST, 2024 – FEBRUARY, 2025

RESREACH ASSISTANT, CCRC- INSTITUTE OF METALLURGY AND MATERIAL ENGINEERING, PU, LAHORE, PAKISTAN.

Conducting research on the corrosion behavior of magnesium alloys, focusing on surface treatments and electrochemical behavior. Assisted in corrosion lab sessions and mentored a research group for potential publication

JULY, 2023 – AUGUST, 2023

INTERNEE ENGINEER, HEAVY MECHANICAL COMPLEX (HMC), TAXILA, PAKISTAN.

Throughout my 4-week internship, I actively engaged in the responsibilities, spanning production planning and control, mechanical tasks, foundry and forge works, quality assurance and control, and technology-related duties. This immersive experience not only broadened my skill set but also provided me with a fundamental knowledge base in these crucial areas.

EDUCATION

2020-2024

BSC. (ENGG.) METALLURGY & MATERIAL ENGINEERING, UNIVERSITY OF PUNJAB, LAHORE, PAKISTAN.

GRADE: 3.58 CGPA

2018-2020

INTERMEDIATE IN PRE-ENGINEERING, PUNJAB COLLEGE OF SCIENCES, LAHORE, PAKISTAN.

GRADE: A+

2016-2018

MATRICULATION IN SCIENCES, MASHAL BOY HIGH SCHOOL, LAHORE, PAKISTAN.

GRADE: A+

SKILLS

- Non-destructive Testing
- Corrosion Engineering
- Surface Characterization
- Non-Ferrous Metallurgy

PROJECTS:

- Final year project:

- **Project Title:** Surface Modification of AZ31b Mg Alloys through Calcium Phosphate Conversion Coatings for Investigating Dissolution Behavior and Biocompatibility

Conducted a comprehensive study on the surface modification of AZ31b Magnesium Alloys through the application of calcium phosphate conversion coatings. This project aimed to enhance the material's properties for potential biomedical applications.

- Academic project :

- Two or more pieces of hollow cylinder need to be manufactured using sand molding technique and aluminum alloy.
- To Determine and study the Effect of different % of Bentonite Clay and Moisture Content on the Dry Compression Strength of Molding Sand.
- To create an assembly of components that can transform rotational motion to linear motion using a CAD software's of your choice.

CERTIFICATIONS:

- Certificates of Participation:

- Attended *"Introduction to occupational safety and Health as Profession"* seminar organized by Procyon Group.
- Attended *"Internship Webinar 2.0"* webinar organized by Career Crafters.
- Attended *"Use of Conventional Advanced NDT Technique in Asset Condition Assessment Process"* webinar Organized by Velosi Integrity & Safety Pakistan.

- Workshops:

- Attended *"2 days Nanotechnology Training Workshop & One day Symposium on Nanotechnology research"* organized by NIBGE, Jhang Road, Faisalabad, Pakistan.
- Attended *"2 days workshop on Nanotech Essentials"* organized by Department of Plant pathology, University of Punjab, Lahore, Pakistan.
- Attended *"01 CDP Point workshop on Advancing casting technology"* organized by Pak-Austria Fachhochschule: Institute of Applied science & technology, Haripur-KPK, Pakistan.
