

Apply For Vendor Inspector Mechanical

Osman Gone

Mechanical Inspector

CSWIP-3.1, API 510,570,653, QMS ISO 9001 :2015

& NDT LEVEL-II (RT, UT, MPT, DPT)

E-mail : goneosmanrana@gmail.com

Phone : +966 53 973 4913

Driving License-KSA

Professional Highlights:

- Dynamic and Competent mechanical engineer with **12+ years** in welding inspection of process equipment and Piping with leading organizations involved in petro chemical, power plant, oil & gas industries.
- Experience in Static, rotating equipment installation, alignment, welding & Process piping inspection.
- Conversant with various phases of inspection as per ITP, WTP, QCP and various standards for inspection and various QC procedures used on projects.
- Carry out intermediate & Final inspection as per RFI at various stages, Issue & close punch lists and handing over to client after final completion.

Educational Certifications:

- B.Sc. in Mechanical Engineering – Sonargaon University.
- Diploma in Mechanical – Bogra Polytechnic Institute 2008.

Technical Certifications:

- CSWIP 3.1 Level-II Certificate no. 631110, Issued date: 7th October 2014, Expiry date: 24th January 2030.
- API 653 Certificate no 126486, Issued date: 30th April 2025, Expiry date: 30th April 2028.
- API 570 Certificate no 118507, Issued date: 31st May 2024, Expiry date: 31st May 2027.
- API 510 Certificate no. 114526, Issued date: 30th November 2023, Expiry date: 30th November 2026.
- Certified Internal Auditor Quality Management Systems as per ISO 9001:2015.
- **ASNT NDT Level II Certificate in:**
- RT, Issued date: 2nd June 2009, Expiry date: 28th May 2029.
- UT, Issued date: 2nd June 2009, Expiry date: 28th May 2029.
- MT, Issued date: 2nd June 2009, Expiry date: 28th May 2029.
- PT, Issued date: 2nd June 2009, Expiry date: 28th May 2029.

Key Skills:

- | | | |
|----------------------------|-----------|--------------|
| - Asme Section V | - API 510 | - SAES-W-011 |
| - Asme Section VIII Div.II | - API 570 | - SAES-W-012 |
| - Asme Section IX | - API 571 | - SAES-A-004 |
| - Asme B31.3 | - API 574 | - SAES-A-007 |
| - Asme B16.5 | - API 580 | - SAES-L-150 |
| - Asme PCC-2 | - API 653 | - SAEP-351 |

Employment History:

1. Welding / Piping QC Inspector (11th December 2024 to till now)

Abraj Al Hafar General Contracting establishment

Project: Jazan Integrated Gasification and Power Company Power Block Shutdown Project. (JIGPC)

Baish, Jizan, KSA. (Annex-65 Battery Limit Isolator Works, Annex-85 Modification & Installation Works).

2. Welding QC Supervisor (November 2021 to October 2024- 03 years)

SS Power I Ltd (S Alam Group)

Project: 2x660 MW Coal Fired Super Critical Thermal Power Plant

Banshkhali, Chittogram, Bangladesh.

3. Welding QC Supervisor (February 2021 to October 2021 – 09 months)

Mitsubishi Heavy Industries Ltd (MHI)

Project: Ghorasal Polash Urea Fertilizer Project, Narsingdi, Bangladesh

4. Welding QC Inspector (December 2018 – January 2021 – 02 years 2 months)

Entrepose - PT. Istana Karang Laut (IKL)

Project: 10,000 BPD Condensate Refinery Project, Chittagong, Bangladesh.

5. Third Party Inspector (TPI)-Welding Inspector (May 2015 - December 2018 – 03 years 8 months)

Bureau Verities Bangladesh Private Ltd.

Project:

I. JMI Industrial Gas Unit-2 (LPG Plant)

EPC Contractor: Space tech Equipment & Structural Pvt Ltd.

II. Condensate fractionation plant & associated facilities capacity 4000BPD

at Rashidpur, Bahubal, Hobiganj, Bangladesh.

Client: Sylhet Gas Field Limited (SGFL)

EPC Contractor: Energy Pac Power Generation Ltd (EPGL) & Consortium Partner Pt. Istana Karang Laut (IKL).

III. Navana LPG Plant (Mongla port)

Client: Navana CNG Ltd.

EPC Contractor: Parlym International.

IV. Build Trade Engineering Ltd (Pre – Fabricated Steel Structure Manufacture)

Client: Sikalbaha 225mw $\pm 10\%$ Combined Cycle (Dual Fuel) Power Plant, Bheramara Combined Cycle Power Plant

6. Welding Inspector (January 2014 - April 2015 – 01 years 7 months)

The Pipeline Engineers & Associates Ltd (PEAL).

Siddirgonj 335 MW combined cycle power plant, Bangladesh.

7. NDT Technician (August 2011 to July 2013 – 02 years)

Worked as a multi technician in “TOMTEC NDT MARINE SERVICES PTE LTD SINGAPORE”

Third party Ndt inspection for ship builders in "Sembawang shipyard Pte Ltd" on different types vessel very large crude carriers (VLCCs), Oil tankers, bulk carriers /container / cargo vessels, LNG carrier, repairs chemical tankers, liquefied gas carriers, Floating storage production offloading (FPSO) and navy ships.

Welding Activities.

- Review the scope of work, Interpretation of Welding Procedure Specifications (WPS).
- Preparation of procedure qualification test record (PQR).
- Preparation of welder qualification test (WQT).
- Work with different types of welding process (e.g. SMAW, GTAW, GMAW, FCAW, SAW)
- Preparation of consumable issue requests & arrangements at shop & site for welding works.
- Monitor welder qualification test (WQT) & ensure controllability of repair rates.
- Undertake supervision, co-ordinations and shop & field activities in the area of welding works.
- Evaluates the qualifications of welders and assign them for the shop & site activities.
- Extensive knowledge gained in the welding of carbon steels; Low/High alloy Steel & various grades of non-ferrous materials like SS etc.
- Conducting the welding procedure qualification & Welder performance qualification tests for different kind of base metal & Welding Process.
- Establishing welding sequences to avoid distortion.
- Executing periodical calibration for welding equipment.
- Monitoring stage wise welding jobs including pre-heating, post heating & PWHT stages.
- Undertaking the complete preparation & review of QCP, ITP, WPS and PQR.
- Calculate required welding electrode as per joint design.

Piping Activities.

- Document review as per project such as ITP, QCP and Method of statement.
- Inspecting the materials regarding Traceability, Physical condition as per project specification with Mill Test Certificate Generate weld map on isometric drawing & confirm accuracy of weld maps to related welding summary.
- Review P&ID's, Plot Plan, GA & ISO drawings, layouts, diagrams, technical specifications, work estimates for erection & commissioning of system.
- Preparation of As-built drawings wherever modifications like additional joints, difference in length and fittings.
- Monitoring calibration status of welding machines, Inspection tools, Quivers, Ovens, Hydrostatic Gauges etc.
- Checking proper alignment orientation correct dimensional & cleaning before Fit-Up and after Welding.
- Inspecting joint configuration of Fit up prior to weld as per approved WPS.
- Inspection of Spool Releasing & Internal Cleaning.
- Inspection the fabrication, erection, inspection, examination and testing of piping various classes and grades according to isometric drawing and specification.
- Inspection of Spool Pre-installation, Valve installation & Erection.
- After completion of construction walk-down of piping note punch lists and categorize into priorities for testing clearance.
- Verify line list for test pressure, NDT & arrange all necessary test equipment e.g. Test diagram, Test manifolds, Pressure gauge, Chart Recorder & PSV/PRV etc.
- Inspection of Tie-ins and golden weld joints.
- Monitoring & Witness torque value when bolts tightening on flange joints.
- Test Pack preparation, Punch listing, and Visual test, Hydrostatic & Pneumatic Test inspection.
- Inspection of Visual Test, Hydro Test, Pneumatic Test & Service Test.
- Inspection of Lay-Up (Such as Dry, Wet, Ambient & Inert Gas etc.) activities.
- Inspection the Re-instatement and Master Punch List.
- Prepare quality dossier after completion of piping reinstatement.

Tank Activities.

- Review drawing, Project Specification, Procedure & ITP for tank erection.
- All incoming Materials inspection for tank erection.
- Selection of welding process for Shell, Bottom, Annular & Roof plate Welding.
- Verify dimension for roundness (Annular Plate & Shell Plate), plumpness, peaking & banding and ensure dimension is within range as per procedure & standard.
- Verify the nozzle fit-up on shell & ensure their arrangement as per drawing & within acceptable range.
- Selection of NDT (Such as RT, UT, DPT, MPT etc.) on shell plate per tank as per procedure & standard. All other parts of tanks select NDT (Such as RT, UT, DPT, MPT etc.) as per joint categories.
- Witness & monitoring Vacuum Box (VB) test on Bottom plate & Leak Test on nozzle reinforcement pad.
- Settlement checks prior by pressure gauge when perform hydro-test.

Steel Structure Activities.

- Examining the levelness of shim Plate pipe racks, vertical & horizontal foundation prior to installation.
- Supervise the installation of steel structure as per drawing.
- Verify the tightening of bolt connections required torque value.
- Supervising mixing ratio of grouting, correct grouting material for steel structure column.
- Tracking the completeness of appurtenances structure such as service platform, ladder & Rafter.
- Conduct inspections during the field installation / erection of structural components, monitoring welding activities and scheduling the necessary ndt.
- Inspection of fabrication & installation of Turbine building steel structure works.
- Generator foundation, Compressor foundation, BF Pump Foundation etc.

Quality Assurance & Quality Control Activities.

- Maintaining quality standards for materials, ensuring stringent adherence to quality standards, norms & practices.
- Conducting internal audits & external audits of Quality Management System (QMS).
- Working in close coordination with work groups for conducting process audits and conducting review and approval of quality plans and detailing on quality requirements and finalizing the quality plan.
- Review Project Quality Plan (PQP) and Inspection Procedure & Categorization Plan as per QA & quality deliverables.
- Implementing QMS across all projects; preparing project procedures and ITP.
- Ensuring that all the site activities are in accordance to the latest revision of drawings & procedures.
- Identifying the non-conformances, addressing them in the Non-conformance Report (NCR) and resolving them through preventive actions; maintaining the NCR log book and following up to close NCR.
- Maintained update precision tools/equipment calibration log.
- Ensuring conformance of work with quality, safety, health and environment requirements and interacting with the contractor(s) to take corrective action in case of any necessary.

Personal Profile:

Father's Name : Joynul Abdin

Mother's Name : Rowson Ara Begum

Date of Birth : 01st January 1988

Blood Group : O (Positive)

Religion : Muslim

Sex : Male

Marital Status : Married

Passport : A06940900

Driving License : KSA

Present Address : Baish, Jizan, KSA.

Permanent Address : Aurjuntala, Senbagh, Noakhali, Postal Code: 3860, Bangladesh.
