Profile

Results-driven Procurement Specialist with over 7 years of experience in supply chain management, demand planning, and procurement operations. Skilled in vendor negotiations, cost reduction strategies, and inventory optimization. Proficient in Microsoft Dynamics AX and ERP /MRP systems, ensuring seamless procurement processes and supply chain efficiency. Committed to reducing operational costs, improving supplier performance, and maintaining optimal stock levels.

Procurement Specialist

2016 - Present

Bostani Company

- Managed end-to-end procurement operations, including issuing RFQs, evaluating supplier bids, and processing purchase orders (POs).
- Procured diverse materials and services from local and international suppliers, negotiating pricing and contract terms to achieve significant cost reductions.
- Led demand forecasting and inventory planning, ensuring optimal stock levels while minimizing excess and obsolete inventory.
- Scheduled the supply of materials and components to meet operational requirements and maintain minimum safety stock levels.
- Analyzed supplier performance, identified alternative vendors, and implemented strategies leading to cost savings and improved material availability.
- Coordinated complex logistics and international transportation, optimizing shipment costs and ensuring timely deliveries for various goods.
- Managed container loading and international shipments using Incoterms, coordinating with suppliers and freight forwarders to ensure accurate documentation, cost responsibility, and timely delivery.
- Handled product registration and clearance through regulatory platforms (e.g., SABER and FASAH), ensuring compliance for all imported materials and streamlining customs documentation.
- Managed inventory levels, focusing on aging products, slow-moving items, and discontinued SKUs to enhance warehouse efficiency.
- Supervised regulatory registration and customs compliance for international materials, ensuring adherence to all requirements.
- Collaborated closely with the finance team to streamline supplier payments, implement cost control measures, and improve cash flow.
- Negotiated long-term supplier contracts, improving delivery lead times and ensuring robust supply chain stability.
- Utilized ERP systems (Microsoft Dynamics AX) to track comprehensive procurement activities and manage supplier databases.

Achievements

- Developed an annual purchasing plan, strategically aligning procurement activities with overall organizational sales and operational targets.
- Partnered with design teams to introduce new, profitable product lines, contributing to business expansion.
- Introduced multiple international suppliers, resulting in substantial cost reductions and increased company profitability.
- Expanded logistics and delivery options, significantly lowering transportation costs for distribution channels.
- Implemented off-site assembly for key components/products, leading to significant reductions in production time and costs.

Logistics and Operation Coordinator

2013 - 2016

Bostani Company

- Scheduled product deliveries, ensuring consistent stock availability at various distribution points.
- Managed shipment tracking, proactively addressing delays and resolving delivery issues to maintain operational flow.
- Optimized local and international shipments by negotiating with carriers and utilizing data-driven solutions to reduce costs and improve delivery speed.
- Improved local logistics operations, optimizing efficiency and reducing costs across the supply chain.
- Maintained strong relationships with forwarding companies (e.g., DHL, SMSA, FedEx) to ensure reliable service.
- Processed returned goods and managed loss/damage claims effectively, minimizing financial impact.
- Analyzed transportation data to identify areas for route improvement and efficiency gains.
- Prepared and presented regular reports on logistics and routing performance to management.

Achievements

- Developed a nationwide distribution system, ensuring monthly stock requirements were met across all locations.
- Created a shipping duration table for various destinations, significantly improving on-time deliveries.
- Established contracts with multiple logistics companies, enhancing shipping flexibility and responsiveness.
- Initiated air shipping options with major carriers, ensuring faster and safer delivery for urgent orders.
- Designed a seasonal production priority system, leading to optimized resource allocation and reduced overtime costs
