Objective

Metallurgy & Materials Engineer with hands-on experience in steel melting, QC, and furnace operations. Seeking a role in production, quality, or materials to apply technical and analytical skills.

Education

- Shah Abdul Latif College MPK** 2020
Pre Engineering
A
- Dawood University of Engineering & Technology** 2025
B.E Metallurgy & Materials Engineering
3.16 CGPA

Experience

- Karachi Shipyard & Engineering Works** 23/08/23 - 25/09/23
Ex internee
4 weeks internship in the following department: 1) Foundry, 2) QC-NDT, 3) laboratory
- Faizan Steel Mill Pvt. Ltd** 04/07/25 - Present
Assistant Engineer - Production (Steel Melt Shop)
Conducted slag sampling & analysis during heat progression.
Monitored carbon, Si, Mn compositions and optimized additions.
Coordinated with furnace operators to control melting efficiency.
Ensured proper tapping, ladle handling, and quality compliance.

Projects

- Polymer Tiles From Waste Polymer Materials**
A polymer tile was made using waste polymer materials. The process involved placing the materials into an iron mold and applying heat, which allowed the polymers to melt and take the shape of the mold, forming a solid, durable tile after cooling.
- Development of Dual-Functional Fish Skin Grafts for Burn and Wound Healing (FYDP)**
Developed antibacterial & antifungal fish-skin grafts using natural treatments (Alum, Papaya, Aloe Vera, AgNO3). Conducted characterization, cross-linking, and agar diffusion testing against E. coli. Achieved improved biocompatibility and cost-effective healing performance

Skills

- Induction Furnace Operation
- Problem Solving
- Slag Analysis
- Project Management
- Spectrometer & Lab Testing
- Attention to detail
- Mateditor
- Team Collaboration

Certification

- IOSH (Institution Organization Of Safety And Health) level 2
- One Day seminar on Non-Destructive Testing - Dawood University of Engineering & technology
- Environmental Sustainability From the Start: Building Environmental Strategies into Project Design - Velosi
- Quality improvement and Management Certificate - Coursera
- Protecting the world: Introducing Corrosion Science Certificate - Coursera
