

MOHAMED ANWAR
**Mechanical & welding
Inspection specialist**

Profile

Engineering profession and Certified Welding inspector with **5 years' of experience** in mechanical and welding inspection across fabrication and construction inspection. Skilled in applying ASME, AWS D1.1 and API standards, reviewing and qualifying WPS and PQR, identifying welding defects, monitor fit-up and NDT evaluation.

Personal Data

Name: Mohamed Anwar

D.O.B: 15-01-1999

Address: 32/7 Sornapuram St,
Tenkasi – 627811,
Tamilnadu, INDIA.

Mobile No: +91-6369619038

Email: anwarmd1599@gmail.com

Nationality : Indian

Religion : Muslim

Passport No: U5706181

Marital Status: Single

Language : Tamil, English, Hindi,
Malayalam

Education

■ B.E in Mechanical Engineering

National College of Engineering, Anna University – India
(06/2016 – 06/2020)

■ Higher secondary certificate

R.C Higher Secondary school, Tamil nadu, India.
(05/2015-05/2016)

Certificates

- CSWIP 3.1 Welding inspector
- ASNT – NDT Level 2 (PT, MPT, UT, RTFI)
- AutoCAD (2D & 3D)
- Internal Auditor for ISO 9001:2015 (QMS)

Skills

- Good knowledge of Verbal & Written Communication
- Inspection Documentation & ITP
- Basic knowledge in NDT methods.
- Competed in reading engineering drawings, weld map and isometric drawing reading.
- Welding techniques.
- Root cause analysis & correcting action.

Work Experience

• Nasser Mohamed Al-Baddah & Partner of Contracting (NBTC)

Saud i Arabia (June 2024 – Aug 2025)

• Bahrain Maintenance and Diving Service

Bahrain (Feb 2022- Mar 2024)

• Madras Engineering Industry PVT LTD

Chennai, INDIA. (Aug 2020-Jan2022)

Responsibility in NBTC (Saudi Arabia) / Mechanical & welding inspector

- Reporting to the QA/QC manager and project manager.
- Proper storage and preservation of materials and consumables as per project requirement.
- Verification of material certificates (MTC), heat numbers, and traceability.
- Conduct visual inspection of weld joint before, during and after welding as per ASME 31.3, AWS D1.1, API and project QA/QC procedure.
- Verifying Welder Performance Qualification (WPQ) certificate for compliance with ASME section 9 and ISO 9606.
- Fit up inspection the first portion is to check the material identification thru heat number traceability.
- Inspecting fit-up, alignment, orientation and dimensional accuracy before welding.
- Spool internal cleaning inspection prior to erection.
- Bolt torqueing inspection as per approved procedure.
- Led all client-facing inspections for critical welding systems, achieving a 100% acceptance rate on final NDT with No major non-conformances.
- Performing hydro test and layup.
- Witness and review NDT results of repaired welds before final acceptance.
- Conduct material receiving inspection to see to it that no discrepancy between the material requisition to the material to be receive proved by the material mill certificate to be inspect by means of dimensional and thru heat number traceability.
- Pickling and passivation.
- Preparation of pre- test punch list of piping systems.
- Inspect and maintain the positive pressure of the preserved piping systems and static equipment's.
- Conduct line checking, punch listing, alignment check prior to leak testing Reinstatement check.
- Conduct inspection of materials and equipment to conform to reference standards and specification.
- Preparation of as built Isometric drawings prior to test package completion and documentation.
- Involve in preparing pre-punch list of piping systems as isometric and P&ID.
- Co-ordinate with construction crew for pre-punch closing before (A-punch) hydro test.
- Preservation of test completed subsystems with positive pressure.
- Establishing and maintaining the quality plan reports.
- Review and verify WPS, PQR and Welder Qualification Records.
- Monitoring welding parameters, preheat, and inter pass temperature.
- Preparing of Welder continuity records, and repair rate.
- Conducting the welder qualification test as per ASME sec 9.
- Carried out inspection and verification of weld repairs as per approved procedure.
- Reduced weld repair rate by 15% through proactive monitoring and real time feedback to welding teams.
- Conducting tool box meeting.
- Ensuring that all piping activities are carried out in accordance with approved procedures and standards.

Responsibility in BMDS (Bahrain) / Mechanical & welding inspector

- Developed and maintained the projects quality documentation system, ensuring 100% traceability for all welds and materials.
- Monitor and supervise welding activities, ensuring correct materials, consumables, preheating, inter pass temperature and welding parameter are used mentioned in the WPS.
- Coordinate and witness non-destructive testing such as RT, UT, MPT, PT and interpret inspection result in accordance with applicable standards.
- Verify calibration and condition of welding and inspection equipment's.
- Monitor preheat, inter pass, PWHT (Post Weld Heat Treatment) and hardness testing as per ASME sec 8 and project ITP required.
- Maintain and update inspection reports, weld map, repair logs and daily welding progress documentation in accordance with ISO 9001:2015 QMS.
- Ensure welder hold valid certifications and assigned tasks within their qualification range.
- Ensure the internal cleanliness activity before fit-up and pipe spool erection.
- Conduct fit up and Visual Inspection of all piping and welding works from piping prefabrication to field installation.
- Check pipe spool fabrication based as approved isometric drawing, bill of materials and applicable codes.
- Conduct inspection of flange joint orientation, alignment, gasket flange ace, valve orientation, valve flow direction as isometric drawing and applicable standard and specification.

Responsibility in MEI (India) / QA/QC Inspector

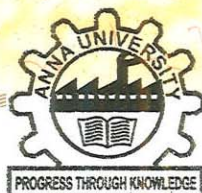

- Inspect the product under the QMS and HSE procedure & policy.
- Separating the NDT rejected material on the workflow.
- Assemble Inspection and Verifications as per the drawings.
- Making the MPT & PT report and provide feedback and interpretation to production management.
- Housekeeping is done in the inspected area after inspection is done.
- Oversee safe use of equipment and schedule regular maintenance.
- Check and ensure every 1/10 product are produced in correct measurement.
- Check the whole dimension of the material by using a proper gauge.
- Calibrating the gages before and end of the shift by using the third-party certified calibration block.
- Provide a detailed quality inspection of products using tools such as micrometers, calipers and gauges.
- To Supporting the production team in monitoring, identification and modification process.
- If there are any same defects in continuous production, immediately report to the QC team and help to take corrective action.

Declaration

- Hereby declare that the above facts and information provided above are true and authentic to the best of knowledge and belief.

EMPLOYMENT CERTIFICATE

To Whom It May Concern:

This is to certify that **Mr. Mohamed Anwar Peer Mohamed**, holder of Indian Passport No.U5706181 CPRNo.990139891, has been employed by Bahrain Mechanical and Diving Services Co. WLL as **QC Inspector** from April 01,2022 to Jan 25,2024.

This certification is being issued upon the request of the employee and the company holds no responsibility whatsoever for its purpose.

For BAHRAIN MECHANICAL AND DIVING SERVICES,

MOHAMMED MUSAYEB
Director

IMAYA INTERNATIONAL INSTITUTE OF NDT

4, EAST CAR STREET, POOKADAI BAZAR, AMBASAMUDRAM, TIRUNELVELI DT.
